11. Detailed Report of the Programme:

The Postgraduate and Research Department of Economics, Shift-1 organized a lecture on "EVS TRIP" 08.02.2023 09.00 am.

This trip covers environmental issues: how people are aware of animals, habitats, conservation and natural resources. The reason for choosing the subject is that there are many people who visit the zoo every day to see it in person. This subject of protecting nature and natural resources should be taught to most children and adults in the country. So learn about the importance of preserving this natural resource for sustainable development and maintaining the balance of the ecosystem. Applying eco-friendly practices in and around zoo, it is highly appreciable. Chief Minister of Tamil Nadu announced new schemes like online ticketing service and live streaming service of important animals with special announcements. It was well received by the public. Animal health is even more important in our zoo. They try to ensure that animals are regularly examined for any disease and preventive measures are taken on time. The sanitary and hygiene of the animals is in order. The long-term work of the veterinarians and biologists of zoos made all this possible. The results are clear - recorded captive reproductions. The Students are Split in to teams to collect the information by observing and interviewing methods.

12. Outcome of the Programme/event:

1. To know the tourists reason for visiting Vandalur Zoo.
2. To know the Environmental activities in Vandalur Zoo.
3. To know the Experience in Vandalur Zoo.
4. Activities given the Students.

To

The Secretary,  
Department of Economics-Shift- II,  
Dwaraka Doss Goverdehan Doss Vaishnav College,  
Arumbakkam,  
Chennai – 105

Through: The Principal, Dwaraka Doss Goverdehan Doss Vaishnav College

Respected Sir,

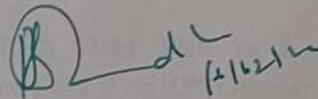

Greetings of the day. The Department of Economics, shift –II has proposed to take the students of II BA ECONOMICS on a field trip to SEMMOZHI POONGA as a part of Environmental Studies. In this respect I kindly request your esteemed self to release Rs. 15,000 (under SA10 j) as listed in the budget.

Thanks and Regards,

Dr. V. Meenakshi.

**Dr. V. MEENAKSHI, M.A., M.Phil., Ph.D., SET**

## DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE

(AUTONOMOUS)

Reaccredited With A++ Grade by NAAC

College with Potential for Excellence, Linguistic Minority Institution,  
Affiliated to University of Madras, Arumbakkam, Chennai - 600 106

1. Soft copy of the invitation:

2. Name of the Event: EVS Field Visit to Semmozhi Poonga
3. Date: 22/12/2022
4. Venue: Semmozhi Poonga
5. Mode: Offline
6. Organizers: Department of Economics (Shift – II)  
Organizing Secretary/ Head I/C: Dr. V Meenakshi  
Faculty Coordinators: Dr. S Vanathy, Ms. N Jayashree
7. Participants:  
No. of Staff Participants: 02  
No. of student participants: 104
8. Detailed Report of the Program: An “EVS Field Visit to Semmozhi Poonga” was organized by the Department of Economics, Shift II on 22<sup>nd</sup> October, 2022. Dr. V Meenakshi organized the visit. The garden features eight subgardens displaying flora of different varieties, such as a tree court, mural walk and bonsai, herbal and exotic gardens, in addition to an artificial duck pond. Incorporating elements of an Indian-Buddhist garden, the garden has a wide variety of indigenous species.
9. Outcome of the Program/ Event:
  - a) A field trip or excursion is a trip to a place away from their normal environment by a group of people.
  - b) The trip is usually to observe education, non-experimental research or to provide learners with experiences outside their daily activities, such as camping with teachers and their classmates.
10. The study is to observe and probably collect samples of the subject in its natural state.

**PROGRAM**

**TOPIC: Environmental Studies Trip (EVS)**

**DATE:** 3<sup>rd</sup> March 2023

**PLACE:** FARM GURU – KARANODAI CHENNAI

**TIME:** 9:30Am to 5:30Pm

**MODE OF DELIVERY:** DIRECT

**CLASS:** II BBA A

**FACULTY COORDINATORS:** Dr. Rao Prashanth Jyothy, Dr. B. Esther Rani.

**NO. OF FACULTY COORDINATORS:**2

**NO. OF STUDENT PARTICIPANTS:** 53

**REPORT:**

As a part of Academic activities of Environmental Studies Subject, we have taken our II BBA 'A' - 53 students to Farm Guru to have exposure towards village atmosphere as well to get exposure with the farming procedure and have some experience in it. The Farm guru is basically 65 acre cultivating place with various forms of paddy, vegetables and fruits. All these process and cultivation are done only organic based without any artificial fertilizers. This farm was one of the best examples of other farms to know about organic cultivation. Our students got to know more about various activities carried out by the farm and student involved themselves in ploughing, farming, bullock cart ride, etc., The students had a briefing section by the representative of farm guru and also the students were served morning breakfast, lunch and snacks on the both the session. At the end group photo was taken as a token, the students received a sampling and few vegetables cultivated in farm guru. Also the students were instructed to plant the sampling in their home and also informed them to share the picture after planting the sampling.

**OUTCOME OF THE EVENT:**

It helped the students to know about the Farming procedure and the time duration to cultivate each and every crops and vegetables. Moreover, the students got to know about organic farming and how to save the environment. The students had a great experience in village atmosphere as well as they exposure towards the instruments used for farming etc.

## EVS field trip

### REPORT

The field trip started from the college at 9:30 am which was on 3<sup>rd</sup> March 2023, we travelled in bus arranged by the management of our college. We reached at 10:45 and the place name was "FARM GURU", had our breakfast which was idly and medu vada, which was good but they weren't giving extra vada's. Followed by that we had a speech from the owner of "FARM GURU", the speech was really very good and it inspired everyone who listened to it. In his speech he stated that how he also came from his college and learned this process which were our activities of the day. Then the management of the farm taught us ploughing (it made a good experience how it is done), then we learned how to plant the crops and how much time it takes for growing. The management had a very good knowledge in this fields which made a good impression for us. Around 12 pm we had snacks which was lemon juice and boiled sundal which re-charged us and we were able to enjoy the activities nicely.

We did trashing, which is used to take rice from the crops, which is been followed by the old people and it

has been followed there too. Now days which is done through machines. Followed by that we had our lunch which was south Indian meals, the menu was (rice, sambar, rasam & kar kollam). The food was awesome and much better than morning food. We then went for rides on the tractors it was a good experience which made good vibes.

Then we went to see the whole farm for a round It was 64 acres place the overall they used to grow almost all fruits and vegetables and pulses as well. One small complaint I have for the teachers as they didn't explain what where the activities like we had a small pool not a pool but it was like that so they didn't inform us that we should bring extra pair of clothes with us, I just got to know from another subject teacher, so we missed that enjoyment part. But overall it was good.

Then in the evening we had pineapple juice which was also good. Following that we had our class group photo session and the management of farm guru gave us a gift when we were returning which was 2 radishes and a plant of some flower. Then we returned to the college around 6 pm then we left for our homes.

## FIELD TRIP REPORT

B .SRI KRISHNA MOHITH

21E2223 II BBA B

2113101096279

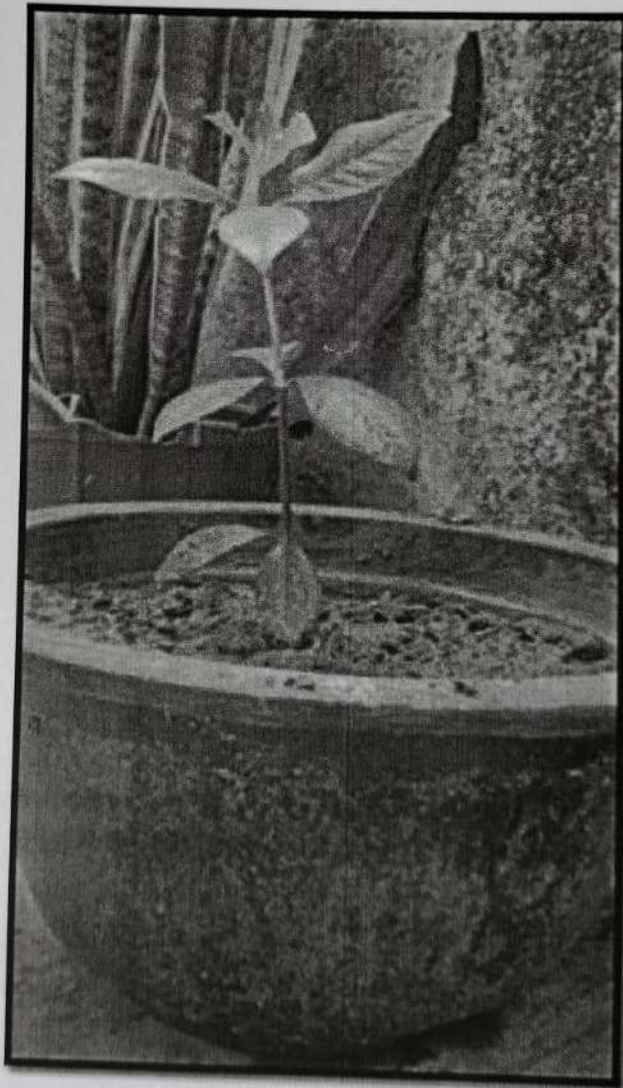

## ACTIVITIES OBSERVED :

- PLOUGHING
- SOWING
- WINNOWING
- TRACTOR RIDE
- BULLOCK RIDE
- FARM TOUR

## **OUTCOME OF THE VISIT :**

By visiting Farm guru , I got an oppurtunity to learn various steps in the agricultural process and how much time and sweat it would require to produce a single crop , working daily under hot sun isnt a easy job , but farmers work round the clock with passion and are emotionally connected to soil and nature of the farm . After seeing the hardwork put in by farmers it makes me think twice before wasting food and I also learnt that how much amount of time and process it takes to get food into my plate

REACCREDITED GRADED NAAC A++ (3<sup>rd</sup> Cycle)

**Academic Year: 2022 - 2023**

**Location: Farm Guru**

**Date of Field Visit: 06.03.2023**

**No. of Students Participated: 62**

**Batch: 2021 - 2024**

**No. of Faculty attended: 4**

**Trip Report:**

As a part of our assessment for EVS subject our department has planned a one-day trip to farm guru. We were quite excited about the trip as we could be able to recall all our native vibes. Farm guru is basically a 63 to 64 acres farm which is located in the outskirts of Chennai.

**Summary:**

- As soon as we reached the Farm Guru at 9.30am, we had an organic breakfast.

- Then we had a small presentation given by Mr. Veerarahavan, who is one of the facilitators of farm guru. He explained about the ancient agriculture methods, varieties of fruits and vegetables cultivated in farm guru and also the farming methods what they are following.
- Our students immediately started doing ploughing, sowing etc.
- We sowed seeds which gave a pleasant experience for us.
- Then we had some fresh juice, sundal and took a bath from the motor pump set.
- Then we went on for some fishing activities and tractor ride.
- After having our organic lunch and walk around the total farm and clicked some cool pictures.
- Overall visiting farm guru gave us some knowledge on natural farming and how youngsters should take up agriculture.

### **Knowledge Gained from Farm Guru:**

It is not enough that we should learn the botany and zoology of agriculture. It is not enough that we should learn the physics and chemistry of reducing effort and increasing yield. It is the time we should learn the actual cost of fertilizers, the economics of genetically modified crops and the political science behind farmer suicides.

The ultimate goal of farming is not growing crops, but cultivation and perfection of human beings.

- Approximate land area – 64 acres
- Farmers working – 25 on daily basis/Wages - Rs.600 per day
- Executives /Facilitators – 6 members /Salary - Rs.22000-26000/month
- Maintenance of Farm Guru – Rs.2.5 lakhs
- In farm guru we observed that to save water and use it effectively and efficiently for crops they use drip irrigation method for crops. So now let us see some about drip irrigation method.

- Drip irrigation is the most efficient water and nutrient delivery system for growing crops. It pours water.
- And nutrients directly to the plant's roots zone, in the right amounts, at the right time, so each plant gets exactly what it needs, when it needs it, to grow optimally. Thanks to drip irrigation, farmers can produce higher yields while saving on water as well as fertilizers, energy and even crop protection products
- Water and nutrients are delivered across the field.
- In pipes called 'dripper lines' featuring smaller units known as 'drippers. Each dripper emits drops containing water
- And fertilizers, resulting in the uniform application of water and nutrients direct to each plant's root zone, across an entire field

**Outcome of the Program:**

- Field Visit is a way of enhancing classroom learning by making real world connections especially for the subject like EVS.
- Students should experience open expanse, fresh air with the smell of the soil, the beauty of lush green fields and the songs from the birds on the trees, cultivation etc.
- They will realize the economic and ecological importance of farm animals.
- As the management students they have to know about the farming (day-to-day expenses, maintenance cost, profit etc.)

# EVS ASSIGNMENT

## FIELD TRIP REPORT

Yash Helwa  
21E2305  
2BBA 2

### FARMGURU

#### Activities Completed:

- > Orientation into farming
- > Ploughing Activity
- > Sowing Activity
- > Re-Planting
- > Tractor Ride
- > Bullock Cart Ride
- > Elevated Pump Set

#### My Experience:

We, the students of the BBA department arrived at the college at 8 AM and began our journey to FarmGuru by bus. After a short ride of about 45 minutes, we arrived at the location where we were given an orientation into farming and

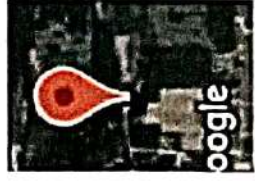

what we were expected to do during our time there. We started by ploughing the field to eradicate the weeds from the soil, followed by sowing and sowing-plantation. Post lunch, we enjoyed our time in the bullock cart and tractor rides. We returned to college by 3PM in the evening with a day filled with memories and loads of learning.

# "FARM GURU"

## INTRODUCTION:

On 6<sup>th</sup> March 2023, Around 150 students and our faculties went for a field trip to "farm guru" located Attur village, Sholavaram in Tamil Nadu.

We started from our college by 9:00 A.M. and we reached at the place by 10:20 A.M.

We students wanted to get experience of farming and planned to visit this place.

We were really excited to educate us more about the farming and to know more about the field used for the farming process.

We started our trip with fun and enjoyment from our college by playing songs and dancing in the bus.

We wanted to experience a day with farmer, to get fresh air, the open space, the smell of the soil and the beauty of green paddy fields with the sounds from the birds.

It made us to feel the real experience of the nature.

### Trip Objective:

The objective of the trip was to get to know about the nature and the beauty of the place. We had the experience hands on experience on farming. We learnt ploughing, weeding, sowing and harvesting.

### FIELD OBSERVATION:

They explained us about the organic farming, drip irrigation and the traditional method of farming. We students got an opportunity of riding on bullock cart and tractor ride.

We started with our delicious breakfast, and after ploughing we had a snack break with lemon juice and sundal which was served to everyone. After that we had a massive enjoyment in the pumpset which was located at this place.

We took many reels and we friends altogether played in water and most importantly we had a good time with my friends.

After all this we came to have our afternoon lunch which was served from sweet to curd rice with pickle. and then we had sometime to spend with nature walking through fields with fresh air and yet nature beauty view. In the evening, we were again served with juice and snacks which was delicious!! we experienced the place which was full of greeny where ever you see!. As we live in the society of tall apartment, and buildings. we don't get more fresh air and we don't see more greeny places. This place were full of pleasant and peace where you can hear the birds sound and get free from vehicle sound and pollution to get free air.

They were of more plantation of paddy fields and most with coconut tree, banana tree (Musa Hybrid) and the plantation of watermelon with drip irrigation facilities and then we had cattle ploughing

Which is being an a traditional farming tool for loosening or turning the soil before sowing seed or planting.

Then we took a view on a pond which is located in the main which has cat fishes. The cat fishes wastes which is being used as a manure for the plants in the fields.

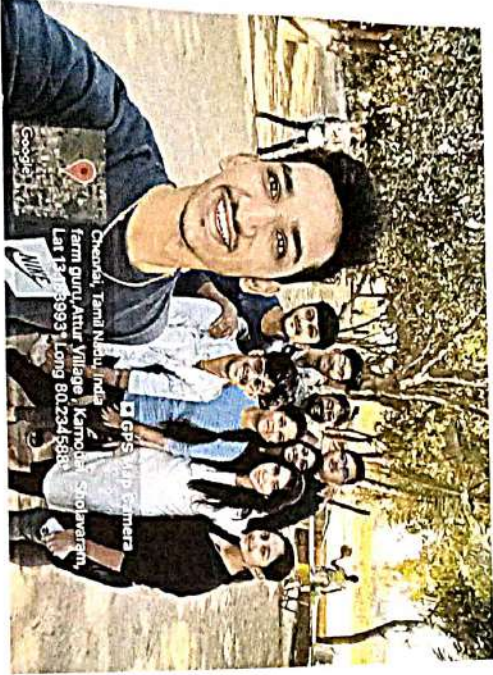

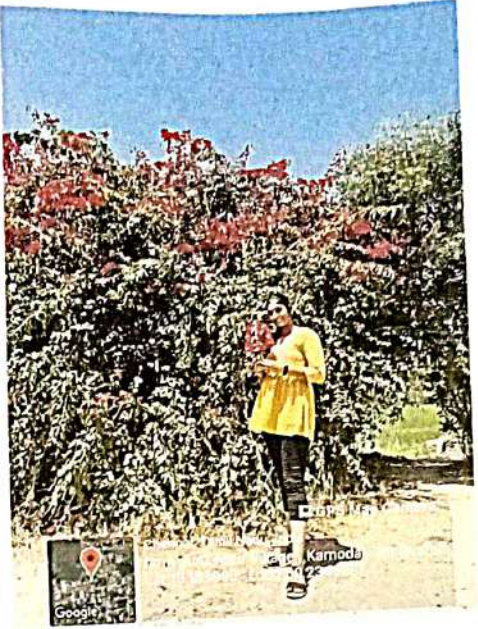

### CONCLUSION:

Our trip got ended by 4:30 p.m on the same day.

It has been a roller coasters of excitement, happiness a connection between us and the farm, and felt refreshed being there! It has been a great opportunity to visit the "farm yum" and we came to know about the farm fieldings. To the most happiest and a memorable day! ✨

"AND INTO THE FIELD I GO TO LOSE MYMIND AND FIND SOU"

**PG & RESEARCH DEPARTMENT OF COMMERCE SHIFT- I**

**Name of the Event:** Environmental Science Field Trip

**Date:** 24.03.2023 , Friday

**Timings:** 07:30 am – 02:30 pm

**Venue:** Arignar Anna Zoological Park, Grand Southern Trunk Road, Vandalur,  
Tami Nadu.

**Organizer:** PG & Research Department of Commerce

**Class:** II B.Com **A, B, C**

**No. of Students participated:** **240**

**Faculty Coordinators:**

1. Dr. J. Sathish
2. Dr. M.R. Hemamalini
3. Dr. M. Rajesh
4. Dr. K. Moneesh Kumar
5. Dr. G. Yamuna

**Detailed Report:**

The PG & Research Department of Commerce organized Environmental Studies Field Trip to Arignar Anna Zoological Park, Vandalur on 24.03.2023 during 07:30 am-3.00 pm. The day began with students departing from the college to the Zoo at 07:30 am. The bus reached the zoological park at around 09:30 am. The students were given entry pass and were let to view the extremely diverse animal exhibits scattered all over 1490 acres of zoo. The zoo holds home to about 2644 animals of over 171 species. The students experienced the immerse wild habitat in the controlled environment. The special attraction in the zoo is their White Tiger exhibit where the students witnessed one of the most ferocious beings enjoying the summer sun. The Exotic bird exhibits showcased a variety of beautiful birds from around the world. The zoo serves as a cradle for near extinct and at-risk species and the students had an exciting opportunity to view them live and learn more about their habitat and behaviors. The students made not of the animals, about their species for their reports. The students took pictures of and with all the animals in the exhibit.

**PG & RESEARCH DEPARTMENT OF COMMERCE SHIFT- I**

The aquarium exhibits showcased an array of fresh water fishes and also features a few sea water fishes. The Zoo is made pleasant by the occasional peacocks and deer which wander around the shades of trees. Apart from majestic animals from the Great Bengal Tiger, Panther, Asiatic Rhinos, Leopards, white tigers, wild bulls the zoo also features Lizards and other amphibians including Crocodiles, alligators, and Turtles.

According to the Association of Zoos and Aquariums, zoos and aquariums have over 181 million visitors each year. We have already shared the many benefits of visiting an aquarium, so now it's time to take a closer look at zoos. Visiting a zoo offers so many incredible learning opportunities. While having a fun day exploring, kids will develop valuable skills and obtain priceless knowledge. A day at the zoo also encourages a healthy lifestyle while bringing friends together. It is the perfect day trip destination for any season!

The students were informed to assemble at the Zoo's parking where food was served to all the students shortly after which the students were taken back to the college at around 02:30pm.

**Overview of the Program:**

1. To enlighten the students on the bio-diversity of animals and their habitats.
2. To create awareness about at risk and endangered species around the world
3. To highlight the importance of inter-dependence of animals and humans

**Benefits in time of Learning:**

1. Knowledge about bio-diversity.
2. Importance of wildlife conservation.
3. Allows for exploration and self discovery.
4. Increase the academic Knowledge.

**DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE (AUTONOMOUS)**

**GRADUATE DEPARTMENT OF COMMERCE (SHIFT-II)**

**REPORT ON B.COM EVS TRIP**

**CONTENT OF THE REPORT**

**Acknowledgment:**

- 1.Expresses gratitude to various individuals and groups who contributed to the success of the trip.
- 2.Faculty members and staff for planning and coordinating.
- 3.Local experts and guides for sharing knowledge.
- 4.Fellow students for active participation.
- 5.College administration for overall support.

**Introduction:**

- 1.Briefly introduces the purpose and context of the report.
- 2.Mentions the date of the trip.

**Objectives:**

Lists the specific goals of the trip, such as observing and documenting bird species, understanding the ecological importance of Vedanthangal, and fostering environmental responsibility among students.

**Activities:**

Describes the key activities undertaken during the trip.

**Bird Watching:** The main activity involving students observing and identifying birds with the help of guides.

**Interactive Sessions:** Educational discussions led by local experts about bird sanctuaries, migratory patterns, and Vedanthangal' s role in conservation.

**Nature Trails:** Guided exploration of the diverse ecosystems within the sanctuary.

**Documentation:** Encouragement for students to document their observations through photos and written notes.

**Conclusion:**

Summarizes the overall success of the trip. Highlights the educational value of the experiences gained during the excursion.

## INTRODUCTION

On [11.03.2023], students from Dwaraka Doss Goverdhan Doss Vaishnav College embarked on an enlightening Environmental Studies (EVS) trip to Vedanthangal, a renowned bird sanctuary located in the Kancheepuram district of Tamil Nadu. This educational excursion aimed to provide students with practical insights into the rich biodiversity, conservation efforts, and environmental significance of the region.

Vedanthangal Lake Bird Sanctuary is one of the oldest water bird sanctuaries in the country. It has been fiercely protected by the local population for well over 250 years

It is a home for migratory birds, such as pintail, garganey, grey wagtail, blue-winged teal, common sandpiper ETC.,

## OBJECTIVES

- 1.To observe and document the diverse avian species present in Vedanthangal.
- 2.To understand the ecological importance of Vedanthangal and its role in avian conservation.
- 3.To gain insights into sustainable environmental practices implemented in the sanctuary.
- 4.To foster a sense of environmental responsibility and awareness among students.
- 5.To gain insights on rare species and threatened ecological communities

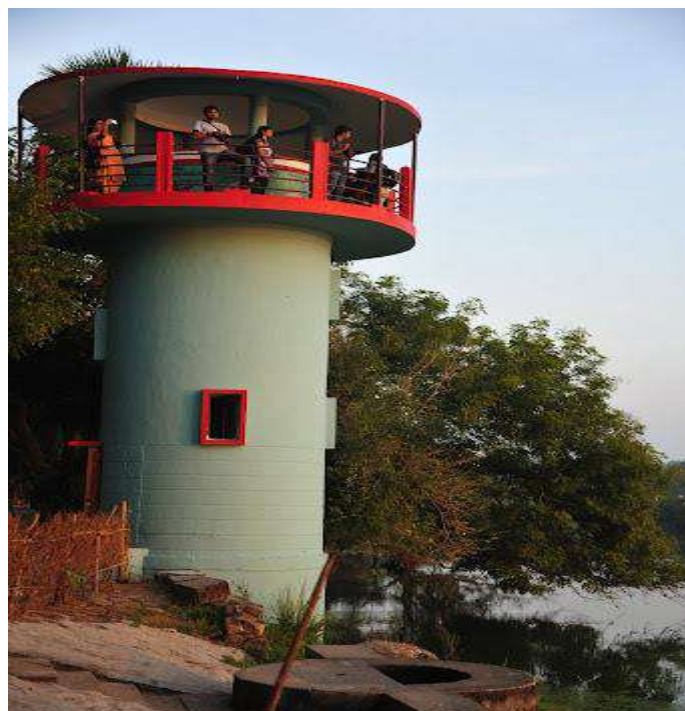

## ACTIVITIES

### **Bird Watching:**

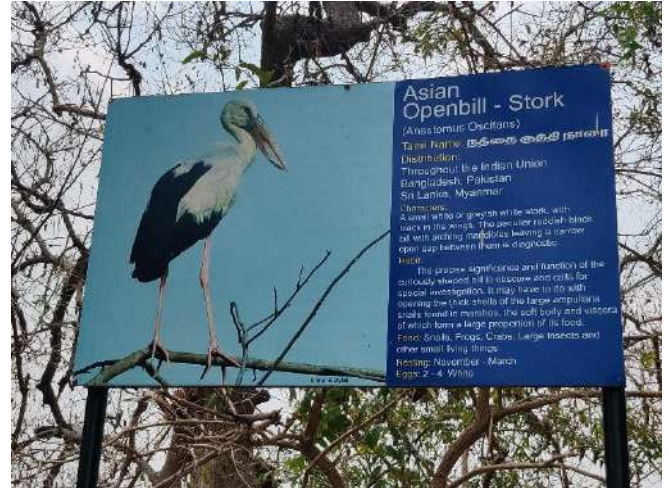

The primary activity of the trip involved students engaging in bird watching sessions facilitated by experienced guides. Vedanthangal Bird Sanctuary is picture-perfect place for bird watchers and lovers to spend time, observing these flying delights. Vedanthangal is a bird watchers paradise, especially during the winter season, when birds in a myriad of colors and kinds descend on the lake in hordes. Every year over 1,00,000 birds make their home in a lake housed in this 30-acre marshy park. Students were provided with binoculars and bird identification guides to enhance their bird watching experience. A watching tower is also available.

## Interactive Sessions:

Local experts conducted interactive sessions to educate students about the importance of bird sanctuaries, migratory patterns, and the role of Vedanthangal in the conservation of avian species. Students had the opportunity to ask questions and gain deeper insights into the ecological dynamics of the region. Students actively participated in discussions and activities aimed at promoting sustainable living.

## Nature Trails:

Guided nature trails allowed students to explore the diverse ecosystems within the sanctuary. This hands-on experience enabled them to witness the intricate balance of flora and fauna, fostering an appreciation for the interconnectedness of nature. The boards fixed in the sanctuary gave us more insights about the birds much more..

## Documentation:

Students were encouraged to document their observations, capturing the biodiversity of Vedanthangal through photographs and written notes. This documentation served as a valuable resource for post-trip reflections and educational purposes.

**REPORT ON B.COM EVS TRIP**

## **INTRODUCTION**

**[11.03.2023], students from Dwaraka Doss Goverdhan Doss Vaishnav College embarked on an enlightening Environmental Studies (EVS) trip to Vedanthangal, a renowned bird sanctuary located in the Kancheepuram district of Tamil Nadu. This educational excursion aimed to provide students with practical insights into the rich biodiversity, conservation efforts, and environmental significance of the region.**

Vedanthangal is a historic and long-standing example of community conservation; farming communities surrounding the sanctuary have protected it for centuries, knowing that an active bird population helps irrigate and fertilize their fields with guano-rich water. These villages abstain from all detrimental activities that may affect bird life, including a self-imposed ban on the use of firecrackers during Diwali.

Vedanthangal Bird Sanctuary has a deep personal connection for many, as it is a 'playschool' for bird watchers. It also serves as a refuge to 11 species evaluated as strongly declining in the recently published *State of India's Birds* report, and is the nesting ground of several near-threatened species such as the Oriental Darter, Black-headed Ibis, Spot-billed Pelican and Painted Stork

The second year of B. Com General (shift -II) was arranged for a field trip at vedanthangal. There were more than 10 kinds of birds in large area. And a field was also there. More than 40,000 birds (including 26 rare species), from various parts of the world visit the sanctuary during the migratory season every year.

Vedanthangal Lake Bird Sanctuary is one of the oldest water bird sanctuaries in the country

## **OBJECTIVES**

- 1.To observe and document the diverse avian species present in Vedanthangal.**
- 2.To understand the ecological importance of Vedanthangal and its role in avian conservation.**
- 3.To gain insights into sustainable environmental practices implemented in the sanctuary.**
- 4.To foster a sense of environmental responsibility and awareness among students.**
- 5.To gain insights on rare species and threatened ecological communities**

Vedanthangal Bird Sanctuary is picture-perfect place for bird watchers and lovers to spend time, observing these flying delights. Students were provided with binoculars and bird identification guides to enhance their bird watching experience. A watching tower is also available.

The breeding waterbirds found at the vedanthalgal bird sanctuary are:

**Common Coot: (*Fulica atra*)**

1. Distribution:

- Throughout the Indian union upto 3000 m in the Himalayas, Bangladesh, Pakistan, Sri Lanka, Myanmar.

2.Habit & Characters

- A slaty black, dumpy, practically tailless waterbird, very duck-like when swimming in the distance. The ivory white pointed (not flat) bill and frontal shield (on forehead) are diagnostic, As a resident, found sparingly on rush - bordered irrigation tanks etc. In winter, numbers vastly augmented by immigrants from central and western Asia and then abundant on most large jheels, especially in northern India.

3.Food:

- The coot is an omnivore, and will take a variety of small live prey including the eggs of other water birds. as well as algae, vegetation, seeds and fruit.

4. Eggs:

- Laying up to 10 eggs, sometimes 2 or 3 times per season

**Darter or Snake - Bird (*Anhinga melanogaster*):**

1.Distribution:

- Throughout the Indian Union Bangladesh, Pakistan Sri Lanka, Myanmar.

## 2.Habit & Characters:

- A black cormorant - like water bird with silvery grey streaks on the back, and velvety brown head and neck. Chin and throat whitish; tail long, stiff, wedged. Only the slender; snake-like neck shows above the surface, swaying and turning this way and that, aptly suggestive of the bird's name.

## 3.Food:

- Fish

## 4.Nesting:

- November - February

## 5.Eggs:

- 3-4 pale greenish blue

## Asian Openbill - Stork (Anastomus Oscitans)

### 1.Distribution:

- Throughout the Indian Union Bangladesh, Pakistan Sri Lanka, Myanmar.

### 2.Habit & Characters:

- Character:

- A small white or greyish white stork, with black in the wings. The peculiar reddish black bill with arching mandibles leaving a narrow open gap between them is diagnostic.

○ Habit:

- The precise significance and function of the curiously shaped bill is obscure and calls for special investigation. It may have to do with opening the thick shells of the large ampullaria snails found in marshes, the soft body and viscera of which form a large proportion of its food.

3. Food:

- Snails, Frogs, Crabs, Large insects and other small living things

4. Nesting:

- November - March

5. Eggs:

- 2-4 White

Indian Cormorant (*Phalacrocorax fuscicollis*):

1. Distribution:

- Throughout the subcontinent but not in Himalayas, Sri Lanka.

2. Habit & Characters

- Separated from Little Cormorant by longer and more slender bill. Breeding birds have white feather tufts behind eyes and white speckles on head and neck. Gregarious, often in large flocks in jheels, rivers, etc., as with other cormorants

3. Food:

- Fish

4. Eggs:

- 2-6

## ACTIVITIES

### Bird Watching:

There are innumerable things to do while you are savoring the incredible mix of flora and fauna. From spending quality time with our friends to watching beautiful migratory birds, every moment passes quickly in the serene environment of Vedanthangal Bird Sanctuary. Undoubtedly, most of the people coming to Vedanthangal enjoy birdwatching. You can see thousands of birds here, from terns to migratory birds like spoonbills. Birds migrating from Bangladesh, Canada, Australia and Sri Lanka can also be seen in this sanctuary.

The sanctuary is a haven for bird watchers and wildlife photographers. The Barringtonia mangroves, the rich floating habitat, extensive paddy field, and those mighty flying creatures make the Vedanthangal Bird Sanctuary a beautiful setting to escape to the crowd and noise of busy city life. Two watchtowers are available here that provide a clear view of the birds from the binoculars stationed there. There is also a viewing platform that provides a vantage point.

### **Interactive Sessions:**

Local experts conducted interactive sessions to educate students about the importance of bird sanctuaries, migratory patterns, and the role of Vedanthangal in the conservation of avian species. Students had the opportunity to ask questions and gain deeper insights into the ecological dynamics of the region. Students actively participated in discussions and activities aimed at promoting sustainable living.

## INTRODUCTION

[11.03.2023], students from Dwaraka Doss Goverdhan Doss Vaishnav College went Environmental Studies (EVS) trip to Vedanthangal, a renowned bird sanctuary located in the Kancheepuram district of Tamil Nadu. This educational excursion aimed to provide students with practical insights into the rich biodiversity, conservation efforts, and environmental significance of the region.

The Vedanthangal Lake Bird Sanctuary features thousands of birds coming from various countries, some of which can be easily identified, others can prove a little more tricky! Although possibly not complete, the list of breeding birds includes:

1. Grey Pelican (*Pelecanus philippensis*)
2. Large Cormorant (*Phalacrocorax carbo*)
3. Indian Shag (*Phalacrocorax fuscicollis*)
4. Little Cormorant (*Microcarbo niger*)
5. Darter (*Anhinga rufa*)
6. Grey Heron (*Ardea cinerea*)
7. Large Egret (*Ardea alba*)
8. Smaller (Median) Egret (*Egretta intermedia*)
9. Little Egret (*Egretta garzetta*)
10. Night Heron (*Nycticorax nycticorax*)

11. 1Openbilled Stork (*Anastomus oscitans*)
12. Black-headed Ibis (*Threskiornis melanocephalus*)
13. Spoonbill (*Platalea leucorodia*)

#### OBJECTIVES

- 1.To observe and document the diverse avian species present in Vedanthangal.
- 2.To understand the ecological importance of Vedanthangal and its role in avian conservation.
- 3.To gain insights into sustainable environmental practices implemented in the sanctuary.
- 4.To foster a sense of environmental responsibility and awareness among students.
- 5.To gain insights on rare species and threatened ecological communities

On our visit in March the entire sanctuary was littered with Painted Storks, it was an astonishing sight  
The best time to visit this sanctuary is from November to March. During this time, birds are seen busy building and maintaining their nests.

#### **Painted Stork**

This place was our first interaction. All we could see is 'birds'. The world starts and ends here with 'birds'. I didn't know from where they are which class they belong to, but all colorful 'Avians' greeted us with their wings flapping in this scorching afternoon. With our knowledge, we could spot Painted Storks, Open Billed Storks, Blue Heron and so many. And once we climbed up the watch tower it was 'all white' as far we could see. Most of the birds were busy picking twigs for their nests or nurturing their eggs. We spotted some storks with a very unique posture.

The trees sprouted from tufts in the lake and the lake was rich with jumping fish and frogs, algae and water fowl. More than 40,000 birds, including 26 rare species, from various parts of the world visit the sanctuary during the migratory season every year. The birds rest, find shelter, and breed on 2,000 partially-submerged trees.

The main species of birds living in Vedanthangal include the birds from the list below:

Birds: garganey, teal, glossy ibis, grey heron, grey pelican, open-billed stork, painted stork, Siberian painted stork, snake bird, spoonbill, spot bill duck, cormorants, darter, grebes, large egret, little egrets, moorhen, night herons, paddy bird, painted stork, pintails, Indian pond heron, sandpiper, shovellers, terns, white ibis, glossy ibis, black headed ibis

**Asian Openbill - Stork (Anastomus Oscitans)**

1. Distribution:

Throughout the Indian Union Bangladesh, Pakistan Sri Lanka, Myanmar.

2. Habit & Characters:

Character:

A small white or greyish white stork, with black in the wings. The peculiar reddish black bill with arching mandibles leaving a narrow open gap between them is diagnostic.

Habit:

The precise significance and function of the curiously shaped bill is obscure and calls for special investigation. It may have to do with opening the thick shells of the large ampullaria snails found in marshes, the soft body and viscera of which form a large proportion of its food.

3.Food:

Snails, Frogs, Crabs, Large insects and other small living things

4.Nesting:

November - March

5.Eggs:

2-4 White

### **Indian Cormorant (*Phalacrocorax fuscicollis*):**

1.Distribution:

Throughout the subcontinent but not in Himalayas, Sri Lanka.

2.Habit & Characters

Separated from Little Cormorant by longer and more slender bill. Breeding birds have white feather tufts behind eyes and white speckles on head and neck. Gregarious, often in large flocks in jheels, rivers, etc., as with other cormorants

3.Food:

Fish

4. Eggs:

2-6

### **ACTIVITIES**

Bird Watching:

The primary activity of the trip involved students engaging in bird watching sessions facilitated by experienced guides. Vedanthangal Bird Sanctuary is picture-perfect place for bird watchers and lovers to spend time, observing these flying delights. Vedanthangal is a bird watchers paradise, especially during the winter season, when birds in a myriad of colors and kinds descend on the lake in hordes. Every year over 1,00,000 birds make their home in a lake housed in this 30-acre marshy park. Students were provided with binoculars and bird identification guides to enhance their bird watching experience. The sanctuary is a haven for bird watchers and wildlife photographers. The Barringtonia mangroves, the rich floating habitat, extensive paddy field, and those mighty flying creatures make the Vedanthangal Bird Sanctuary a beautiful setting to escape to the crowd and noise of busy city life Two watchtowers are available here that provide a clear view of the birds from the binoculars stationed there. There is also a viewing platform that provides a vantage point.

once we climbed up the watch tower it was 'all white' as far we could see. Most of the birds were busy picking twigs for their nests or nurturing their eggs. We spotted some storks with a very unique posture

### **Interactive Sessions:**

Local experts conducted interactive sessions to educate students about the importance of bird sanctuaries, migratory patterns, and the role of Vedanthangal in the conservation of avian species. Students had the opportunity to ask questions and gain deeper insights into the ecological dynamics of the region. Students actively participated in discussions and activities aimed at promoting sustainable living.

### **Documentation:**

Students were encouraged to document their observations, capturing the biodiversity of Vedanthangal through photographs and written notes. This documentation served as a valuable resource for post-trip reflections and educational purposes

### **CONCLUSION**

The EVS trip to Vedanthangal by Dwaraka Doss Goverdhan Doss Vaishnav College was a resounding success, providing students with a holistic understanding of environmental conservation and biodiversity. The experiences gained during the trip will undoubtedly contribute to the students' academic knowledge and foster a sense of environmental stewardship in their lives.

The educational excursions regularly, recognizing the instrumental role they play in shaping environmentally conscious individuals who are equipped to address the challenges of the modern world.

## **Trip to Vedanthangal Bird Sanctuary**

During our recent field trip to Vedanthangal Bird Sanctuary, I had the opportunity to witness an incredible diversity of bird species in their natural habitat. Vedanthangal is a protected sanctuary located in the Kancheepuram district of Tamil Nadu, India, and is home to more than 40,000 birds belonging to multiple species.

### **The Journey**

We started our journey from college early in the morning by bus and reached Vedanthangal after a drive of almost 2 hours. The sanctuary was breathtakingly beautiful with a lake in the center surrounded by lush green trees. We were divided into groups of four and were assigned a guide to show us around the sanctuary.

### **The Birds**

The moment we stepped into the sanctuary, we were welcomed by the soothing chirping of birds. Our guide, who was a local bird enthusiast, told us about different species of birds that we were seeing. We saw species like Painted Stork, Eurasian Spoonbill, Cormorant, Pelican, Ibis, and many others.

### **Experience**

The experience of seeing so many beautiful birds at such close proximity was amazing. We were careful not to disturb the birds and made sure to maintain a safe distance. We had the opportunity to take photographs of the birds and even managed to get some beautiful shots!

### **Conclusion**

The trip to Vedanthangal Bird Sanctuary was an experience that I will always cherish. The beauty and diversity of birds that we saw are a true testament to the importance of protecting our natural habitats. I would highly recommend visiting this sanctuary to anyone who wants to witness the beauty of nature and learn more about bird habitats and conservation.

### **Additional Information**

Apart from the bird watching, we also learned about the importance of conservation and how to protect these beautiful creatures. The sanctuary authorities have put in a lot of effort to maintain the natural habitat of birds, and it was heartening to see their dedication towards this cause. We also got to interact with some of the locals who work as bird guides and learned about their experiences in protecting the birds. Overall, it was not just an enjoyable trip but also an educational one that left a lasting impact on me. I would definitely recommend this trip to anyone who wants to learn more about nature and its beauty.

### **Additional Activities**

Apart from bird watching, there were many other activities that we could engage in at the sanctuary. One of the most popular activities was boating on the lake. This allowed us to get a closer look at the birds and their habitat from a different perspective. We also had the opportunity to explore some of the nearby trails and observe other wildlife such as monkeys and butterflies.

Another interesting activity was visiting the interpretation center, which provided us with more information about the sanctuary's history, conservation efforts, and bird species. The center had interactive exhibits and displays that made learning about birds fun and engaging.

Overall, there was so much to do and see at Vedanthangal Bird Sanctuary. It was not just a great place for bird enthusiasts but also for nature lovers in general. I would definitely recommend this trip to anyone looking for a peaceful getaway amidst beautiful surroundings and an opportunity to learn more about our natural world.

## **VEDANTHANGAL EVS TRIP**

### **DwARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE**

Date of the event:- 11.03.2023

#### **III B.COM GENERAL 'A' SHIFT 2.**

Our trip was started on 11<sup>th</sup> march 2023 around 9.30 am from our college campus. Our department head Mr. P. SATHYANARAYANAN sir, planned to have an EVS TRIP. So we students went and got knowledge regarding many birds and we got many information regarding some new birds which we never saw in our life time. Nearly 350 students and our department faculty were enjoyed the trip with new experience.

#### ***WELCOMING PART***

- Once we stepped into the bird sanctuary, we had a wonderful atmosphere like chirping of birds sounds, lake view, the unity of the birds, many small birds like, sparrows sound.
- It was a blissful moment in our life time we are lucky to get into it.
- We saw many birds like Storks, Egrets, Cormorants, Darter, Flamingo, Pelicans, Swans, Kingfishers, etc.

#### **FLAMINGOS:-**

- Flamingos are mostly found in Argentina, Caribbean islands, and in Northern Brazil.
- Flamingo birds nest are made in mud.
- These flamingos are red in color which they will get from their food.
- They eat their food by turning their head upside down.

### **STORKS:-**

- Storks are large, long legged, and wading birds with long, stout bills. They belong to the family called Ciconiidae and the order Ciconiiformes.
- It is found in the wetlands of the plains of tropical Asia south of the Himalayas in the Indian Subcontinent and South Asia.
- These storks eat insects, fish, amphibians, reptiles, small mammals and small birds.

### **Our experience:-**

- We the students of B.Com General, have an wonderful EVS TRIP which was useful to get information regarding birds.
- We saw many rarely birds inside the sanctuary.
- We came to know how the birds are destroyed now a days and its because of high radiation power rising from our gadgets like mobile phones.
- By destroying the forests, we are slowly killing the nature and the lives of birds and some animals.
- Our Nature is the gift given by God.
- As our young generation we need to safeguard the plannet and the earth.
- We should have an awareness regarding the conservation of Birds.

### **CONCLUSION:-**

- DON'T DESTROY THE FOREST
- KEEP SOME WATER TO THE BIRDS IN TERRACE OF THE HOUSE.
- CONTROL POLLUTION.
- PLANT TREES AS MUCH AS POSSIBLE.
- PROHIBITION OF HUNTING.
- AVOID PESTICIDES FOOD TO CONSUME.
- SAVE BIRDS AND SAVE ENVIRONMENT.

**REPORT ON ENVIRONMENTAL STUDIES - FIELD VISIT**

The department of Corporate Secretaryship [Shift-I] organised an Environmental Studies (EVS) Field Visit to Brakes India Private Limited [Foundry division] on 10th March 2023 for the students of II B.Com Corporate Secretaryship. The aim of the visit was to understand the company's efforts towards environmental sustainability and to learn about their practices in managing their environmental impact. An industrial visit is a significant aspect of the education system, which allows students to experience the practical working environment of an industry. It is an opportunity for students to get a glimpse of the real-life working of the company, gain insights into practical applications of theoretical concepts and learn about the various technologies, processes, and products.

**Date and time:** 10<sup>th</sup> March 2023, 11:30 am to 04:00 pm

**Location:** BRAKES INDIA Pvt. Ltd.[Foundry division] Sholingur

**Objective:**

To witness the sustainability measures implemented by the organisation.

To observe the various machines, tools, and equipment used in the company.

To interact with company professionals.

To know more about their contribution to the stakeholders and society

**Participants:**

70 students and 2 faculty members.

**Description:**

Brakes India Ltd is a leading manufacturer of braking systems in India. The company has its headquarters in Chennai and has multiple manufacturing facilities across India. The company

has been in the business for over five decades and has established itself as a prominent player in the automobile industry. The company is committed to sustainability and has implemented various initiatives to reduce its carbon footprint. The industrial visit started with a brief introduction by the HR manager of Brakes India Pvt Ltd. The first section of the visit commenced from the production unit where students observed various stages of the manufacturing process sporting safety equipment such as helmets and glasses to protect the eyes, followed by the Research and Development team to learn about the new product development process. Then, the students had an interactive session with the company professionals who shared their experience and offered career advice.

**Outcomes**

- ❖ Gained practical knowledge about the manufacturing process of the company.
- ❖ Created an awareness about the technology leadership, operational excellence of the company.
- ❖ Students were enlightened about the various sustainability measures implemented by the company.
- ❖ Learnt about the best practices and proactive measures adopted by the company towards development of the area Sholingur and its neighbourhood.
- ❖ The visit was remarkable experiential learning for the students.

No. of Student participated	: 114
Organizing Committee	: Mr. S. Kavitha, Mr. E. Panneerselvam and Dr. S. Karunya
Venue	: Agaram, Thirukazhukundram

### Report of Field Visit

The PG Department of Information Technology & BCA conducted Environmental Studies (EVS) Field Visit on 30.01.2023 (Monday) for II BCA two buses were arranged. Totally 114 students participated in the EVS Visit accompanied by Four staff members. The Visit started from the college at 9.50 AM and reached back by 5.40 PM.

The Organic Farm Named as Tamil Nilam, Tamil Pannai, Agaram, Tamilnadu was visited by the students for EVS field Visit. Introduction speech and environmental related issues like air pollution and how to overcome these issues on environment was given by Dr. Venkateshwara. Briefing Session given by Mr. Guru, Director of Healthforsure concern stating about the usage of millets and how to plant millets. Practical and Experimental Study about the career in organic farming and importance of agriculture was displayed by Mr. Mayil Krishnan, Art Director, Tamil Film Industry.

#### Questions Asked by Students

1. How millets are planted?
2. Did Millet tea stops or reduces grey hair?
3. How Preparation is made on cultivating millets?

Finally, Organic Farming was explained by Mr. Theivasigamani, Proprietor of Tamizh Pannai. He elaborated about the farm where 300 varieties of trees with 12000 independent trees are planted. Through this Field Visit, the students are benefited by acquiring the knowledge about the Environmental issues on agricultural farming and how to cultivate millets. The awareness and importance of millets and natural food habits was insisted. Lunch prepared in the organic farm was provided to the students.

<b>Venue</b>	:	<b>Chennai Rivers Restoration Trust</b>

### **Report of Field trip**

The PG Department of Information Technology & BCA has conducted a Field Trip to for I<sup>st</sup> year BCA (Section A & B) Chennai Rivers Restoration Trust on 01.02.2023 (Wednesday). Totally 102 students participated in the field trip accompanied by two staff members Dr. S. Anitha and Ms. M. Archana reached around 9.00 am. The students were asked to report directly to the Chennai Rivers Restoration Trust Park.

The following observation was done by the students:

The fresh water flowing through the Adyar and Cooum rivers are blocked upstream of the city and diverted to storage reservoirs for the city. The rivers also have sand bars blocking their mouth into the sea, thereby obstructing even the tidal flushing action from the sea and the environment surrounded in the place. There were around 25,000 varieties of trees. Information was collected about few trees. Students eagerly visited all the places. Through this Field trip, the students have benefited by acquiring the knowledge about the Adayar and coovam rivers and the Environmental issues related to it. The field visit was completed by 1.30 PM

# Introduction

- The damming of rivers produces dramatic and far-reaching environmental changes:
  - ❖ of the first order are hydrological changes, including water quality
  - ❖ the second order affects channel morphology and aquatic, riparian, and floodplain vegetation.
  - ❖ the third order includes forests and tribal people.

- ❖ Thus there are important linkages between the physical, chemical, and biological components of river, land and forests systems that are disordered when a river is impounded

## **RAIN / ROOF TOP WATER HARVESTING:**

Water is essential for life and plays a major role in earth's climate. By modifying land use, the proportion of the different pathways, evaporation, percolation and run off change. The never ending exchange of water from the atmosphere to the oceans and back again is known Hydrological Cycle.

In the present day world, rapid urbanization coupled with industrialization has become the order of the day. Added to urbanization, scanty and erratic rainfall is often resulting in reduction in water levels indicating depletion in storage in the surface reservoirs. Dependence on ground water is increasing rapidly over the past two decades. The demand is so high that indiscriminate use of groundwater resulting in steep fall of the ground water levels and there is also reduction in yields.

Apart from this, sealing of permeable soil zone is gradually increasing due to construction activities thereby resulting in reduced percolation of rainwater into the sub-surface and increased surface run-off.

Therefore an urgent need to take up rain / roof water harvesting / conservation methods in urban and rural areas on a large scale, which subsequently help to recharge and maintain ground water balance, in order to make it on a sustainable source.

### **RAIN WATER HARVESTING:**

Concept of rainwater harvesting lies in:

- Tapping the rainwater from where it falls
- Techniques of rainwater harvesting involve

Catch the rainwater from localized catchment surfaces such as roof of a house, plain and sloping ground surfaces etc. It is easy process to collect Rainwater and diverted into ponds, vessels or underground tanks to store for longer periods and to recharge by construction of RWH Structures in a suitable sites.

Rainwater harvesting is in two ways --

1. **Direct Use:** The process of collecting and storing the rainwater by construction of sump through filters for future productive use and

# Space Debris

The exploration and utilization of outer space have been accompanied by a significant increase in the number of objects orbiting the Earth. Unfortunately, this has led to a corresponding increase in the amount of space debris that poses a growing threat to space operations and Earth's environment. The space debris problem is complex and multifaceted, involving technical, legal, and policy issues. This paper examines the origins, nature, and consequences of space debris and proposes measures that can be taken to mitigate its impacts.

The concept of space debris is not new. It has been recognized as a problem since the launch of the first satellite in 1957. However, it was not until the mid-1980s that the magnitude of the problem became apparent. Today, there are over 27,000 objects larger than 10 cm in diameter in Earth's orbit, with an estimated 128 million smaller pieces of debris. These objects pose a significant threat to space operations and Earth's environment, and the situation is getting worse.

# Air pollution

Air pollution refers to the release of pollutants into the air—pollutants which are detrimental to human health and the planet as a whole. According to the World Health Organization (WHO), each year air pollution is responsible for nearly seven million deaths around the globe. Nine out of ten human beings currently breathe air that exceeds the WHO's guideline limits for pollutants, with those living in low- and middle-income countries suffering the most.

## Causes of Air pollution

Most air pollution comes from energy use .Burning fossil fuels releases gases and chemicals into the air and in an especially destructive feedback loop, air pollution not only contributes to climate change but is also exacerbated by it. Air pollution in the form of carbon dioxide and methane raises the earth's

temperature. Another type of air pollution, smog, is then worsened by that increased heat, forming when the weather is warmer and there's more ultraviolet radiation. Climate change also increases the production of allergenic air pollutants.

- 2.Name of the event: EVS Field Visit to Vedanthangal Birds Sanctuary,2023
- 3.Date: 9.2.23
- 4.Venue: Vedanthangal-Birds Sanctuary
- 5.Mode : Offline
- 6.Organizer: Department of Biochemistry
- 7.Faculty coordinator: Dr.K.Nagalakshmi
- 8.Resource : Government of Tamil Nadu.
9. Staff Participants:Dr.K.Nagalakshmi,Dr.D.S.Pushpa Rani and Ms.Ishwarya
- 10.No. of student participants: 44
- 11.Detailed Report of the Programme

As a part of Student activity and EVS Field Trip, The II BSc BIOCHEMISTRY Students visited **Vedanthangal Bird Sanctuary** on 9.2.23 organized by the PG dept of Biochemistry coordinated by Dr.K.Nagalakshmi and resource was Government of Tamil Nadu and staff participants are Dr.K.Nagalakshmi,Dr.D.S.Pushpa Rani and Ms.Ishwarya and .No. of student participants are 44.Vedanthangal Birds sanctuary is a 30-hectare (74-acre) protected area located in the Madurantakam taluk of the Chengalpattu District in the state of Tamil Nadu, India. The sanctuary is about 75 kilometers (47 mi) from Chennai on National Highway 45 ([NH45]). It is easily reachable from Madurantakam and Chengalpattu. More than 40,000 birds (including 26 rare species), from various parts of the world visit the sanctuary during the migratory season every year. Vedanthangal is home to migratory birds such as pintail, garganey, gray wagtail, blue-winged teal, common sandpiper and the like. It has been designated as a protected Ramsar site since 2022.Vedanthangal is the oldest water bird sanctuary in the country.Vedanthangal in Tamil language means 'hamlet of the hunter'. This area was a favorite hunting spot of the local landlords in the early 18th century. The region attracted a variety of birds because it was dotted with small lakes that acted as feeding grounds for the birds.The best time to visit this sanctuary is from November to March. During this time, birds are seen busy building and maintaining their nests.Villagers near this sanctuary are very concerned about the sanctuary and its winged residents, and they have taken many serious steps to avoid disturbance to the flow of birds.

The Vedanthangal lake bird sanctuary has a tradition of the people actively protecting birds coming to the area since time immemorial. The local people understood the relationship between birds and the productivity of their crops even before the concept of wildlife conservation came into vogue. Towards the end of the 18th century local villagers complained to the collector of Chengalpet Lionel Palace, about the British soldiers shooting the birds. They demanded and obtained a 'Cowle' from the collector (Mr Place, Collector of Chingleput 1796-1798) to protect the birds. In 1936 the collector officially recognized the lake as a sanctuary. In 1962 it was given the legal status of reserved forest under the **Madras Forest Act**.

### 12. Outcome of the programme/event:

1. Need for an ecofriendly approach for a sustainable environment.
2. The local people knew that the bird droppings in the water created guano which acted as fertilizer.
3. The importance of habitat for survival of fauna and flora .
4. Students understood the importance of Migration by birds in the Environment .
5. More than 40,000 birds (including 26 rare species), from various parts of the world visit the sanctuary during the migratory season every year.
6. Birds migrate to India from different parts of the world like Bangladesh, Sri Lanka, Nicobar, Australia and 29 total countries.

### **INTRODUCTION:**

Auroville is ideal because it does not belong to anyone or to anything! Auroville is an experimental township in Villupuram district mostly in Tamil Nadu. Some of its parts are in Pondicherry as well. It was founded in 1968, 28th of February by Mirra Alfassa. She was known as “The Mother”. It was designed by architect Roger Anger. This town was a vision of The Mother from Sri Aurobindo Ashram at Pondicherry as it’s an international town. She envisioned a town where unity will be celebrated and all will have a spiritual vocation.

### **AUROVILLE-THE UNIVERSAL CITY**

### **ABOUT:**

The idea of the project to realize the human unity in diversity and build a transformational future that binds humanity together, which means it is not based on any religion, caste, or even scripture. It is a place where we can stay in perfect harmony in the lap of nature. We can discover this beautiful place in its entirety.

## DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE

### AUROVILLE – THE CITY OF DAWN:

Today Auroville is recognized as the first and only internationally endorsed ongoing experiment in human unity and transformation of consciousness, also concerned with practically researching into sustainable living and the future cultural, social spiritual needs of man.

### SIGNIFICANCE OF THE SYMBOL:

**Auroville**

- The dot at the middle represents **Unity**, the Supreme.
- The inner circle represents the creation, the conception of the city.
- The petals represent the power of expression and realization.

## DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE

### OUR EXPERIENCE:

### VISITOR'S CENTRE:

In this visitor centre, they show video about the mandir and its infrastructures to guide the visitors to the mandir and education about it. It was a nice beginning for exploring.

The place was filled with peace, came across many beautiful plants and decorative hangings. Even the decorative was made by degradable products, this shows the mission of Auroville.

Many foreigners were present and nice to see they following our culture like keeping flowers in their hair. People use bicycles for roaming and renting facilities were made for bicycles.

### OLD BANYAN TREE:

Banyan tree was considered as sacred in India, this made The Mother to place this tree at the centre point of the place. This banyan tree was more than 100 years old and during the construction it was the only tree on the barren plateau.

## DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE

Re-Accredited with A++ Grade by NAAC

College with Potential for Excellence, Linguistic Minority Institution  
Affiliated to University of Madras, Arumbakkam, Chennai – 600 106

### **RESTING HUT:**

Next to the Banyan tree the resting hut was located. The place was in vintage and classic. In Auroville the infrastructure and ambience was eco-friendly

Finally reached the Matrimandir. It is known as Soul of the City, where the integral Yoga is practiced.

There were many shops for food, beverages, clothes, perfume and fragrance shops. Had lunch in that pleasant and peaceful place that was allotted for us.

### **KOVALAM BEACH:**

While returning from Auroville, we went to Kovalam beach. People said that the water body was too deep. The survey says that Kovalam beach is safer than Marina beach; because swimming is dangerous in Marina. So due to this the swimmers have high chance to strike their heads in the sand. One of the reasons Kovalam beach is safe is due to its local fisherman community. Though the place was quite polluted as a youngsters we had fun. This gave us a reminder on our environment.

## DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE

(Autonomous)

Re-Accredited with A++ Grade by NAAC

College with Potential for Excellence, Linguistic Minority Institution  
Affiliated to University of Madras, Arumbakkam, Chennai – 600 106

### OBSERVATION DURING THE TRAVEL:

We came across a few water bodies like ponds, beach and others. Most importantly SALT PANS, which was new to us. Salt pans are shallow open, pans used to evaporate brine. These are usually found close to the source of these salt.

### CONCLUSION:

Though Auroville and Kovalam beach were two different places, they have a few notable similarities. The environment of the Auroville and the waves of the beach gives the peace.

The beach was in polluted state which reminded us the environmental issues. On the other hand, in Auroville the ultimate aim was to follow the sustainable living for the mankind.

### Field Trip Report

1. Name of the Event : **Environmental Visit to FARMGURU Agri. Tech. Center**
2. Date : **10.01.2023**
3. Mode : **Offline**
4. Name of the Staff : **Dr. P. Vijayalakshmi, Mr. V. Dhamodharan**
5. No. of student Participants : 31

### Environmental Visit to FARMGURU Agri. Tech. Center

The students of II B. Sc, Department of Mathematics with Computer Application of Dwaraka Doss Goverdhan Vaishnav College, Chennai went on a one-day trip to **FARMGURU Agri. Tech. Center**, Attur Village , Karnodai, Sholavaram, Tamil Nadu 600067 on 10<sup>th</sup> of

January, 2023. We started from our campus at 9am by arranging private Bus Transport. By 10.30am we reached FARMGURU “The opportunity to experience a farm in all its rustic glory”.

The objective of the trip is to learn about the agriculture and to enjoy the nature. We were warmly welcomed by Mr. Seshsha Sai, Founder, Farm Guru. They conducted two sessions. The **first session** begins with full of entertainment at 11.15 am. He talked about four things strong, think, positive and love and narrated it with working in agriculture. Students learnt the importance of agriculture and the prevention of soil erosion.

Next session is a practical session. Every student directly went to the field, they learn to do how to sow the seeds, plant the saplings, harvesting, threshing and winnowing. This practical experience gave wider knowledge and difficulties faced by farmers.

We were provided some snacks and a tasty tender coconut. We are engaged in playing games and went for a bullock cart ride.

After the lunch Mr. sheshasai taught us about organic farming and its necessity in brief. Clearly the steps involved in farming like watering, weeding, fertilizing and pesticides were explained . Finally the boys took bath in pump set and the trips winds up by 4.15pm. We reached the college campus by 5.30pm.

Conclusion :

Students enjoyed a lot by learning about the agricultural field and had an opportunity to be like a one-day farmer. At last it was a very pleasant place to visit

**Name list of students attended the field trip**

2. **Name of the event:** - EVS Field Trip to Arignar Anna Zoological Park
3. **Date:** 16<sup>th</sup> March 2023
4. **Venue:** - Vandalur Zoo - Arignar Anna Zoological Park, Chennai.
5. **Mode:** - Offline
6. **Organizers:** - Department of Accounting and Finance.
7. **Faculty coordinator:**
  - Dr. Alamelu Sathyabama -Assistant Professor, Dept. of Accounting & Finance, Ph: 7200391009
  - Dr.V.Subhashini - Assistant Professor, Dept. of Accounting & Finance, Ph: 8220281396
  - Dr.C.P.Vijayalakshmi - Assistant Professor, Dept. of Accounting Finance, Ph: 994155244
  - Ms.V. Radhalakshmi – Assistant Professor, Dept. of Accounting & Finance, Ph: 8939315413
  - Dr. M. Koteeswari, -Assistant Professor, Dept. of Accounting & Finance, Ph: 9791097301
  - Mr. Alistar Dominic Joseph, Teaching Assistant, Dept. of Accounting Finance, Ph: 7904656841
8. **No. of Staff Participants:** 6
9. **No. of student participants:** 155
10. **Detailed Report of the Programme:** - On March 16, 2023, a group of 155 students visited the Arignar Anna Zoological Park, popularly known as Vandalur Zoo, in Chennai. The purpose of the visit was to learn about the different animal species, their habitats, and their behaviour in captivity. The trip was organized as part of their subject – Environmental Science.

Upon arriving at the zoo, the students were briefed about the different enclosures and the animals housed in them. The students were divided into groups and assigned to different sections of the zoo to observe and study the animals. Here are some of the observations and findings made by the students during the visit:

- **Habitat and Behavior:** The students observed that the animals were kept in well-maintained enclosures that resembled their natural habitats. They noticed

College with Potential for Excellence, Linguistic Minority Institution

Affiliated to University of Madras

Arumbakkam, Chennai – 600 106

that the animals exhibited different behaviours depending on their species, such as grooming, sleeping, and playing.

- **Animal Species:** The students were fascinated to see a wide variety of animal species, including lions, tigers, elephants, giraffes, and monkeys. They also observed several endangered species such as white tigers and black panthers.
- **Feeding Habits:** The students were able to witness the feeding habits of some animals, such as the lion and tiger, during their visit. They learned about the different diets of animals and how they were provided with a balanced diet in captivity.
- **Conservation Efforts:** The students were impressed to learn about the zoo's efforts in conserving endangered species. They were informed about the research projects, and other initiatives undertaken by the zoo to protect the animals and their habitats.

### 11. Outcome of the programme/event: -

The visit to Vandalur Zoo was an enriching experience for the college students, who were able to witness and learn about different animal species and their habitats. The visit helped the students to appreciate the diversity of animal life and understand the importance of conservation efforts. The students also gained practical knowledge about the protection, preservation and conservation of wild and natural resources as part and parcel of life which can be practiced through visits, observation, discussions and awareness about wider surroundings.

+91 99404 16396
9. **No. of Staff Participants:** 5
10. **No. of Student Participants:** 123
11. **Detailed Report of the Program:**

The Department of Accounting and Finance in association with the Bay of life, Kovalam organized a Marine Science Field Trip on 9<sup>th</sup> & 15<sup>th</sup> March 2023. The instructors at Bay of Life briefed the students on the various marine species, their life span, eating habits and how rare they are. The students were taken on an exploratory beach walk along the coast of Kovalam. They were enlightened on ocean safety, the technique of surviving from drowning in the ocean, formation of waves, tides and currents etc. The students were also taken on a guided Scavenger Hunt along the beach and backwaters habitat, where they got to touch and feel life forms like sea horse, sea coral, sea sponge and rare species of crabs. The students were then shown several live specimens by Mr.Showkath Jamal, Founder, Bay of Life. They learnt about various life forms and gained knowledge about their habitat, adaptability, reproduction, respiration, digestion and feeding habits. The students were also given an opportunity to have a touch and feel of the species. Mr.Showkath Jamal also made the students realise the arduous task of maintaining the Blue Flag Beach status.

### 12. **Outcome of the program:**

The trip created an opportunity for the students to learn something out of their stream and made them realize the importance of their role in saving the environment to create a better living.

11. **Detailed Report of the Program:**

The Department of Accounting and Finance in association with the Students' Sea Turtle Conservation Network (SSTCN) organized a Turtle Walk on 28<sup>th</sup> January 2023. The volunteers at SSTCN briefed the students on the various species of turtles, their life span, eating habits and how they are different from tortoises. They also understood about the environment conducive for a turtle to lay its eggs. They enlightened the students on how a turtle creates nests in the sand by digging pits with a depth of 10 to 15 inches to lay its eggs. They also enunciated that Green Sea Turtle and Hawksbill Sea Turtle are on the verge of extinction and how its important to take action to preserve these species. The talk was followed by a seven kilometres walk from Neelangarai Beach to Besant Nagar Beach. Along the walk the students found many turtle nests and had a first-hand experience on how SSTCN conserves the turtle eggs before they get hatched.

12. **Outcome of the program:**

The session created an opportunity for experiential learning and the students participated enthusiastically in the walk.

# Role of Information Technology in Environment & Human Health

Talking about Information Technology in the fields of environment education and human health as compared to other respective areas such as business, economics or culture and politics, provides a hand in improving the status.

With the growth of internet and technology, geographic information and data gets transmitted generating a higher affluence of the updated information on several aspects of environment and human health.

As several software created for environment and human health studies are available in the market, it makes it friendly for users and helps them learn each subject with ease. Let's get into the article to understand the role of IT in environment and human health a little better.

## Role of IT in Environment

Here are some important roles of IT in the space of environment studies and human health. Check it out.

### 1# Remote Sensing

A satellite-based technique used to assess the ongoing changes in the environment is called Remote Sensing. It helps in predicting natural calamities such as droughts, floods, cyclone or volcanic eruptions etc.

The Remote Sensing technique can also be used in exploring the availability of crude oils, mineral deposits and the location of geothermal power sources.

## 2# Compiling Database

Database refers to a collection of inter-related data on various subjects. While it is stored on a computer, it can be readily retrieved whenever required. In the United States, there are several Distribution Information Centers (DICs) which are linked to each other having a central information network accessible to international database as well.

Coming to comprehensive database, it includes topics like wildlife, forest cover, conservation as well as diseases such as malaria, fluorosis, HIV, AIDS etc.

## 3# Geographical Information System (GIS)

Proved to be a very effective tool in the assessment of environment changes, GIS is technique that imposes thematic maps using digital data on a large number of inter-related or inter-defendant aspects.

Thematic maps can contain data on aspects like water resources, forest land, soil type, crop land, industrial growth, human settlement etc. in a layered form using computer software.

### Application—

- Useful for Land Use Planning
- Interprets polluted zones & degraded lands
- Provides information on atmosphere changes such as monsoon, ozone layer depletion, smog and inversion phenomenon
- Plans for locating areas for industrial growth using Zoning Atlas
- With the help of Remote Sensing, assesses resources, environment conservation and impact

## 4# National Management Information System (NMIS)

It is a part of the department of Science and Technology which has a compilation of database on projects based on Research and Development including information about research scientists and personnel involved.

## 5# Environment Information System (ENVIS)

Established in 1982, ENVIS aims at providing environmental information to policy makers, engineers and scientists across the world in order to generate a network database to examine areas such as pollution control, clean technologies, biodiversity, renewable resources, wildlife, environmental management and remote sensing technology.

The ENVIS network includes participation of several institutions forming a number of nodes and due to its compact network, it is now designed as the National Focal Point (NFP) for INFOTERRA, which is a global environment information network of United Nations Environment Program (UNEP).

The network focuses on creating websites on environment related areas, establishing linkages with several information sources while creating a database on selected parameters and publish bulletins. It works as an interface for users reading upon this subject.

### Objectives of ENVIS-

- Building a repository and dissemination center in Environmental Science & Engineering
- Enhancing modern technologies of processing, storage, acquiring, retrieval and dissemination of environmental information
- Promoting research, development and innovation in environmental information technology
- Providing national environment information in order to fulfil the future needs

# Role of IT in Human Health

While information technology plays a huge role in human health areas such as bioinformatics, genome sequencing, biotechnology, gene engineering, maintaining DTA databases and online medical transcription in order to enhance the space of human health. It also works towards identifying several diseases such as malaria, schistosomiasis, HIV and more.

Understanding Bioinformatics helps in curing severe diseases such as osteoporosis and also helps in Human Genome Project by developing a computer program which focuses on genome sequencing. The aim of this project is to create maps of the entire set of genes in the human cell by decoding almost 3 billion units of human DNA. This is the power of information technology in the sector of human health.

## 6# Online Health-Related Information

The online information portal works as a vast quantum of information related to human health and environment subjects. If a patient wants to self-analyze himself, they can do it. If they wish to consult a doctor, they can also book a consultation online.

OSHA provides an online portal for employees to seek information on hazardous and non-hazardous activities at the workplace to make the employees aware and also provides safety measures to follow.

United States based company, M-Square, recently started Home Medical Transcription System called HomeTrans, which allows the patient to seek online medical service sitting at home. Any person with a computer, phone, helpline number, voice script software or internet can operate medical transcription.

## 7# World Wide Web

With unlimited accessible data available on the world wide web (www), it has now become one of the largest online learning centers to read, understand, learn and act upon using this power web which aims at providing current information on areas related to human health and environment science.

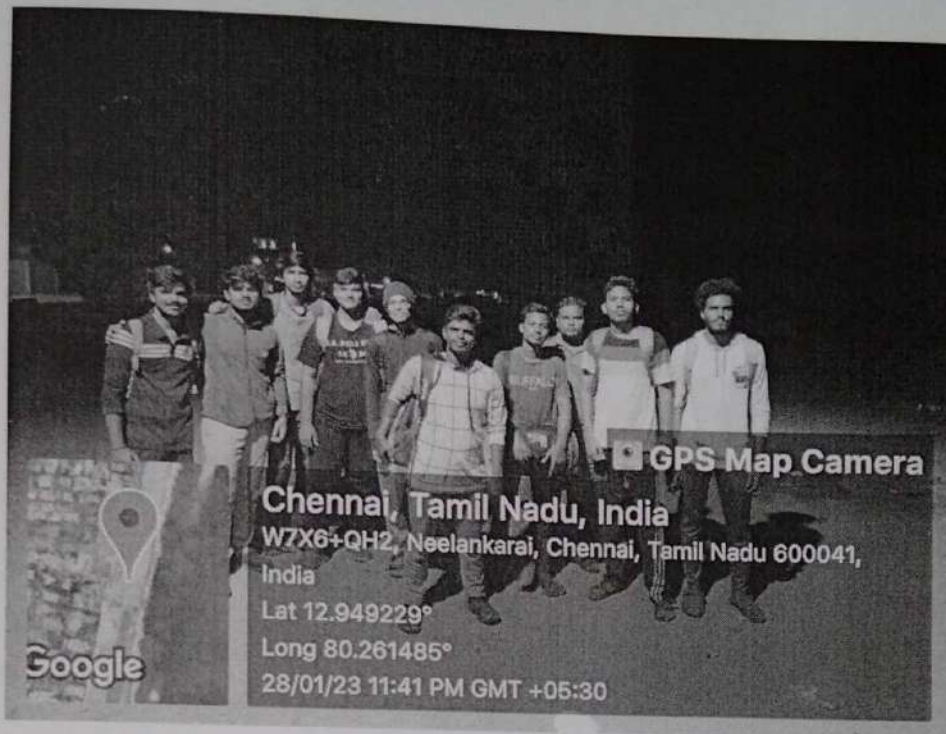

It has made available several activities, digital files, photos, web-exercises, presentations, and quizzes related to the above-mentioned areas which results in helping today's students, teachers as well as professionals working in these fields to pursue environmental and health studies.

## Conclusion

As you can see, Information Technology is rapidly growing in every sector of development especially in the Environment and Human Health space with increasing applications and providing new avenues with an effective role in education, management and planning in these fields.

# REPORT 1: TURTLE WALK

On 28.01.23 me and my friends went to Neelankarai Beach for turtle walk. In that turtle walk we learnt a lot about the turtles. Like its food style, Its life span , How its lay eggs, and where its lay eggs like that. The life span of the turtle is 60 to 100 years. The turtles are totally different from tortoise. The turtle are very active in natural so that the life of the turtle is less than the tortoise. Basically the turtle won't lay eggs on the wet sand. The turtles make a 10 to 15 inch pit and lays its egg. There are 7 species of turtles, In that Green sea turtle and Hawksbill sea turtle are in the edge of dead. In that turtle walk we saw puffer fish and lots of crabs on the beach. That was a good experience to all. At last we saw a huge turtle on the beach.

## REPORT 2: VANDALLOOR ZOO

On 16.03.23 we went to Vandaloor Zoo. Our college arranges bus for us. We enjoyed that bus trip a lot, we dance together and Sing together. After a long time I went to vandaloor zoo. That day was very interested and fun filled one. The main thing is we went with our classmates and teachers. In that vandaloor we took lot of photos. That will be a good memories for us. In vandaloor zoo we saw monkey, tiger, lion, deer, fishes, duck, birds, fox, bear, etc... Among all animals I like bengal white tiger very much. Even in school days also I went vandaloor zoo which was arrange by my school. Once I entered into the vandaloor zoo on that I felt those school days.

# REPORT 3: PARK CLEANING

On 18.11.2022 we went to anna nagar tower park. In that we cleaned that park and make the park to be clean and use by others. Me and my friends done a great work at that park. Everybody appreciate us. From that cleaning we learnt how difficult to maintain a place so don't throw any waste like plastic water bottle, papers, covers, wrappers on the floor.

# REPORT 4: PLANT DONATION

On 18.11.2022 me and my friends went to Tansowa Adharavu Illam for plant donation. We donate 2 plants to the orphanage. Manager of that orphanage spoke with us very well. He tell about why he started this orphanage and when it's started like that. He was good person and he treated everyone with kind. That was a good experience for us to being kind with others. We spoke to them who all are in that orphanage.
