# Kakuro Puzzle

Puzzles are an opportunity for young children to explore kye early math concepts, including shapes, sizes, and how and where one puzzle piece fits with another to make pictures or designs. This type of maths involves spatial reasoning. Like SUDOKU, solving a KAKURO PUZZLE involves investigating combinations and permutations.

The task in **KAKURO PUZZLE** is to fill all empty squares using numbers 1 to 9 so that the sums of each horizontal block equal the clue on its left and the sum of each vertical block equal the clue on its top. In addition, no number may be used in the same block more than once.
