Report on Prarambh 2020

Student Induction Programme

Event name	: Students Induction Programme (SIP) September 2020
Venue name	: Dwaraka Doss Goverdhan Doss Vaishnav College
Platform	: Virtual mode (Youtube streaming)
Date	: 23rd, 24th, 25th September 2020
Organizers	: DG Vaishnav College

Prarambh 2020, the Student Induction Programme for the first year under graduate students of D.G.Vaishnav College was held on 23rd, 24th and 25th of September through virtual mode. The students were grouped according to their disciplines as Arts, Sciences and Commerce and were provided orientation. The You Tube link for the virtual session was shared with the students in advance to enable them to login on time and have a seamless viewing. The viewership included 250 students on Day 1, 400 students on Day 2 and 1004 students on Day 3.

The programme began with the college prayer seeking the blessings of Lord Krishna, the presiding deity of the college. The Secretary Shri Ashok Kumar Mundra, welcomed the freshers to the DGVC family. In his address he observed that the campus ample scope for skill development apart from curricular competence. He assured that they would leave the portals of the college as well groomed and socially conscious adults if they make use of the opportunities available to them. Capt. Dr. S. Santhosh Baboo, Principal, DGVC formally inducted the students, apprised them of the history of the college and motivated them to get themselves educated, enlightened and empowered during their sojourn at DGVC to be able to face the challenges of the world. He emphasised on the importance of hard work and the rewards one would reap if they are diligent, sincere and dedicated in their field. Dr. T. Augustine Arul Prasad, Assistant Professor, Dept of Chemistry, coordinator IQAC, welcomed the students and briefed them on the need and relevance to have an induction and orientation for them. He also spoke on how very important it is to be positive and how perseverance can help one succeed.

The inaugural address was given by Mr. C.K.Kumaravel, Co-founder, Naturals Beauty Salon. He narrated his life experiences to the students on how he had a very simple life, studying in Tamil medium, and rose up to be the Co-founder of the ubiquitous beauty salon Naturals through sheer hard work and continuous learning converting all his down time(wasteful) to uptime(useful).The special address given by Dr. Inspiring Ilango,MD,Ace Panacea Life Skills , was truly inspiring He enthralled and enthused the audience with his life experiences interspersed with motivational music in the voice of the doyen S.P.Balasubramanian. His Q & A session requires special mention as it gave several useful tips to the students as they embark on this new journey.

The students were taken through a virtual tour of the college campus with emphasis on the different blocks with their names, Administrative office, Office of the COE, Canteen, Library, Sports complex and Hostel. The origin, growth and present position of the college was brought to the drawing room of the students through 'DGVC Reminiscences' – an AV presentation. The extension activities and clubs of the college were familiarised to the freshers through a five minute AV presentation on each of the clubs. The AV also provided the contact details to the students to enable them to enrol. As is customary in Live Programmes, Virtual SIP 2020 ended with the Vote of Thanks proposed by Dr. Akileshwari, Asst. Prof. Dept of MSW and the playing of the National anthem.

The first year students attended their respective department orientation in the afternoon session. After a general orientation by the heads of the department, the students were divided into batches of 20 and were allotted a mentor (faculty member). During the mentoring session the students gave a self-introduction which helped them to get acquainted with their peers. The mentors spoke on the importance of physical, emotional and psychological well-being in the present scenario and the need to develop personal, social and moral values. A feedback form was collected from the students at the end of the mentoring session to understand their experiences and their views on Prarambh 2020.

Prelude: Mentoring of mentors- A training session named “***Mentoring the mentors***” was organised on 14th June 2019 at the Vallabhacharya Mini Auditorium in the college. It was an initiative undertaken as per the UGC guidelines, in order to better equip the mentors in handling the first-year students. 118 faculty members from the undergraduate and postgraduate programs were present. The gathering was addressed by the special guest / First speaker of the day **Dr.Vasanthi Ranganathan** , who extensively spoke on the importance of education and the need for the students to develop social skills and the right attitude towards learning. The teachers were then engaged in a group activity followed by discussion regarding various topics such as industry expectations, college volunteering, sports & talent, entrepreneurs, drug usage and concepts of freedom & ownership.

The teachers represented their views about the same on a chart and delivered a small presentation. The morning session ended on this note, and the teachers had a short tea break. Following that, Dr.G. Geetha, Controller of examinations spoke at length about the importance of the student induction program (SIP), that was initiated in many city colleges. The SIP focuses on 8 aspects: physical activity, creativity, cultural, mentoring on human values, lectures that were informal and friendly, visit to orphanages / social work, field trips and film screening.

The post lunch session had **Mr Jeyadoss** from the department of English, Loyola college addressing the mentors. He spoke on the need for constant mentorship even after the first year in college. He stated the qualities that a mentor/teacher should possess, like tolerance, empathy, and that a teacher should be an active listener. He then further elaborated about Maslow’s hierarchy of needs, SWOT analysis, prerequisites of a mentor and most importantly, the need for a mentor to practice what they preach, i.e. set an example for the mentees by their actions. The session concluded with the mentors thanking the speaker for the abundance of knowledge that was imparted and the faculty came forward and shared their experiences and expressed their gratitude.

DAY 1: 17-6-19

PARTICIPATED DEPARTMENTS- All

Venue- College ground

No of students participated-2350

No of parents attended - 3082

Coordinators: Prof M.jayalakshmi ,Dr.T Augustine

Time- 9:30 AM – 2:00 PM

The induction program for the freshers was conducted on the college premises on 17th June 2019. The program had both the day and evening college students along with their parents in attendance. The first day of the SIP 2019 focussed on Institutional and departmental orientation and orientation for freshers. It began at 9:00 with the college prayer, which was followed by the Principal's address. A short Audio-Visual presentation highlighting the facilities, infrastructure and the numerous activities carried out by diverse departments, clubs and committees in providing a platform for the students to showcase their talents and hone their capabilities was displayed. The Secretary of the college, Shri. Ashok Kumar Mundra gave a short speech about the ideals and values that the institution was built upon. This was followed by the Principal-in-charge, Dr.R.Thanigaivel explaining the rules and regulations , enlightening the students and parents alike with his admirable words.

The program ended at 11:00 AM, after which the students of the various departments were taken to their classes by the mentors and student volunteers in order to be briefed about their courses, which was followed by mentoring session – I.

The students then embarked on a campus walk with the volunteers, where they were familiarised with the campus.

DAY 2 :18-6-19

PARTICIPATED DEPARTMENTS- (Shift I) B.COM (GEN), (Shift I) B.COM(CS), B.A(JOURN)

Venue- Lion's Edifice

Speaker-Dr. Inspiring Ilango

No of students participated- 508

Time- 8:15 AM – 4:30 PM

The subsequent days from 18th June to 22nd were structured and had a set of students from specific departments who were initiated into the activities of the clubs followed by a motivational talk by Dr Inspiring Ilango which aimed at instilling confidence and dispelling their fears. The afternoon sessions were structured in a manner to ensure team building in a manner to ensure team building, camaraderie and spirit of togetherness.

The second day of the weeklong orientation program for the freshers was conducted on the 18th of June 2019 at the Lion's Edifice auditorium. The session commenced at 8:15 AM, with the various clubs of the college introducing themselves and giving the students an insight about what they do and how they function. The clubs completed their orientation by 09:30 PM and the next part of the session was presided by the special guest/ speaker for the day, **Dr Inspiring Ilango**. He set out to inspire the students with audio-visual presentations and presented his own life as an example of struggle, hard work and the subsequent success that followed

Post lunch, the students reassembled at the auditorium at 2:00 PM, and were handed feedback forms. After this, they were escorted outside for team building activities, which turned out to be quite fun for the students, who were gradually warming up to each other. The freshers were then made to showcase their talents on stage and were also asked to give their feedback about the Induction program itself. The day ended on a positive note, with the students leaving at 4:30 PM, having had a lot of fun throughout the day and looking forward to their journey in the institution.

DAY 3 :19-6-19

PARTICIPATED DEPARTMENTS- (Shift II) B.COM (GEN), (Shift II) B.COM(CS), B.A(JOURN)

Venue- Lion's Edifice

Speaker-Dr. Inspiring Ilango

no of students participated- 453

Time- 8:15 AM – 4:30 PM

The third day of the weeklong orientation program for the freshers happened on the 19th of June 2019 at the Lion's Edifice Auditorium. Much like the first day, the session commenced at 8:15 AM, with the various clubs of the college introducing themselves and giving the students an insight about what they do and how they function. The clubs completed their orientation by 09:30 PM and the next part of the session was presided by the special guest/ speaker, **Dr Inspiring Illango**. He spoke at large about the need to strive harder and proved to be a source of motivation and inspiration for the freshers.

Later, the students reassembled at the auditorium at 2:00 PM, and were handed feedback forms. After this, they were escorted outside for team building activities, which turned out to be quite fun for the students, who were gradually warming up to each other. The freshers were then made to showcase their talents on stage and were also asked to give their feedback about the Induction program itself. They sang, danced and even rapped on stage, displaying the diversity of talents that had stepped into the college. The day ended on a high note with the students leaving at 4:30 PM.

DAY 4: 20-6-19

PARTICIPATED DEPARTMENTS-BBM,BBA,B.Sc(BIOCHEM),
B.Sc(BIOTECH),B.COM(MM)andB.COM(F&T)

Venue- Lion's Edifice

Speaker-Dr. Inspiring Ilango

no of students participated- 471

Time- 8:15 AM – 4:30 PM

The fourth day of the weeklong orientation program for the freshers happened on the 20th of June 2019 at the Lion's Edifice Auditorium. Much like the previous couple of days, the session commenced at 8:15 AM, with the various clubs of the college introducing themselves and giving the students an insight about what they do and how they function. The clubs completed their orientation by 09:30 PM and the next part of the session was presided by the special guest/speaker, **Dr Inspiring Illango**. He was a very eloquent speaker who captivated the audience with his speaking and singing skills. He lauded the students present for their enthusiasm and eagerness.

At 2:00 PM, the students assembled at the Main auditorium and were handed feedback forms. After this, they were escorted outside for team building activities, which turned out to be quite fun for the students, who were gradually warming up to each other. They showed immense levels of enthusiasm and displayed their talents as the day culminated. The program came to an end at 4:30 PM with the freshers leaving the campus, craving for more.

UG Student Induction Program 2019

DAY 5: 21-6-19

PARTICIPATED DEPARTMENTS- B.Sc(MATHS), B.Sc (Physics), B.A (ECO), B.A (CR & PA), B.A (ENG), B.A (TAMIL) ,BC.A and B.Sc (COMP.SC.)

Venue- Lion's Edifice

Speaker-Dr. Inspiring Ilango

No of students participated- 463

Time- 8:15 AM – 4:30 PM

The fifth day of the weeklong orientation program for the freshers happened on the 21th of June 2019 at the Lion's Edifice Auditorium. With the induction program coinciding with National Yoga day, the session commenced at 8:15 AM with the students practicing yoga at the SRG auditorium for an hour. This was followed by the next part of the day's session which was presided by the special guest/ speaker, **Dr Inspiring Illango**. He spoke on the need to strive harder and proved to be a source of motivation and inspiration for the freshers. The various clubs of the college then introduced themselves and gave the students an insight about what they do and how they function. The students dispersed for a break at 1:30 PM and reassembled at 2:00 PM.

They were then escorted outside for team building activities, which honed their interpersonal abilities and helped them warm up to each other. The freshers were then made to showcase their talents on stage and were also asked to give their feedback about the Induction program itself. The freshers then took over the dais until 4:30 PM and left the audience spellbound with their cultural performances.

DAY 6: 22-6-19

PARTICIPATED DEPARTMENTS- B.Sc(STATS), B.Sc (VISCOM),B.COM (A&F), B.Sc (PSY) ,B.COM (HONSS) and B.A (SOC)

Venue- Lion's Edifice

Speaker-Dr. Inspiring Ilango

No of students participated- 514

Time- 8:15 AM – 5:00 PM

The sixth and final day of the orientation program for the freshers happened on the 22th of June 2019 at the Lion's Edifice Auditorium. Much like the previous days, the session commenced at 8:15 AM, with the various clubs of the college introducing themselves and giving the students an insight about what they do and how they function. The clubs completed their orientation by 09:30 PM and the next part of the session was presided by the special guest/ speaker, **Dr Inspiring Illango**. He interacted with the students and even sang motivational songs for them. He was also pleasantly surprised at the enthusiastic nature of his audience.

Post lunch, the students reassembled at the auditorium at 2:00 PM, and were handed feedback forms. After this, they were escorted outside for team building activities, which emphasised on the need to open up to their peers and interact with one another. The freshers were then made to showcase their talents on stage and were also asked to give their feedback about the Induction program itself. It was on this day that the college witnessed the greatest number of freshers willingly taking the stage and entertaining everyone with their variety of talents. The last day was a grand success, with the students leaving at 5:00 PM, thus bringing an end to the student Induction Program 2019.

UG Student Induction Program 2019

APPENDIX - I

SPEAKER PROFILE

Inspiring Ilango was born totally blind on 6 April 1972 in Adyar, Chennai, Tamil Nadu, India. His blindness is due to the consanguineous marriage between his parents, mother Amsam and father Natarajan, who was her maternal uncle.

EDUCATION

- Primary schooling at Little Flower Convent for the Blind, Teynampet, Chennai.
- High school from standard 6 to standard 10 at St. Louis Institute for the Deaf and Blind, Adyar, Chennai.
- Higher Secondary at Sri Venkateswara Matriculation Higher Secondary school, Royappettah, Chennai.
- Bachelor's degree and master's degree in English with distinction from Loyola College, Chennai.
- M.Phil. in English Language Teaching from the University of Madras.

PRARAMBH'18

18th & 19th JUNE – 2018

UNDERGRADUATE STUDENT **INDUCTION PROGRAM**

PROGRAM REPORT

“WELL BEGUN IS HALF DONE”

Prarambh – which means a new beginning, was well coined for the undergraduate student induction program for the academic year 2018 -19. As a mandate from UGC and as per the guidelines from the principal and management, a team was formed with Dr.V.Sayee Kumar, Head, Department of MA HRM, as convener with the following members.

S.No.	Name of the Faculty	Department
	Dr .V.Sayee Kumar - Convener	HRM
1.	Dr.Sulupriya , Joint Convener	Social work
2.	Dr.P.Murugan	Tamil
3.	Dr.T.Augustine Arul Prasad	Chemistry
4.	Dr.K.S. Manoj	Hindi
5.	Dr.Chandrakala	Commerce
6.	Dr.Pradeepa George	Commerce
7.	Prof.P.Nandhini	English
8	Prof Nanthika	MBA
9.	Prof.V.Mainar	English
10.	Prof K.Amrutha	Criminology
11.	Prof. Meenu Sangeetha	Psychology

The team met several times to finalize the two day program which included audiovisual presentation and motivational talk by several prominent invited speakers. A summary of various events that took place in the two day program is presented in this report.

Prelude: A one day workshop for the first year teachers was organized on 15.06.2018 as a prelude for the induction program. Around 44 teachers took part in the event which was animated by Dr.Vasanthi Ranganathan, a leading trainer and HR Consultant for corporate industries. The faculty members were given ample training in class room management, career building, goal fixing and other musing aspects which can develop students through classroom activity students.

Process Manual for Slow Learners and Advanced Learners (Identification & Activities)

This policy paper is recognized as the “Policy on Advanced and Slow Learners” of Dwaraka Doss Goverdhan Doss Vaishnav College. Through this policy the college pronounces its assurance to the dynamic facilitation and prop up to the advanced learners to be excellent achievers and slow learners to be better performing and achieving students in the academic and personal life. The policy also persuades the teaching departments to develop significant strategies and scientific implementations to benefit both the advanced learners and slow learners

The Concept:

In a classroom environment faculty have to deal with different types of students; the intelligent who learn very fast and the weak who learn very slowly. Therefore, it is essential to determine the abilities of the students in the class. Based on the ability determined, some students need only guidance and some students need rigorous work and regular attention.

Advanced Learners:

The term advanced learner in this policy refers to the students who can engage learning activities faster than the other students in the class and achieve high scores and make significant achievements in their life. They are more potential with their comprehension, retention, memory, critical thinking, creativity and contextualization practices. They also may have hard working behaviors and usually achieve more than the majority of the classmates. These students are in a great extend gifted and talented than the others in the class. These students can take up higher level learning and academic responsibilities. They can bring some new concepts, strategies, and also can take the leadership in the teaching learning activities.

Slow Learners:

The slow learners are always the poor achievers and lag behind with the academic life. They may fail in exams or will score only poor grades. They will find it difficult to understand the lessons and may have difficulties in their comprehension, retention, reproduction and integration. They may fail in articulations and critical reflections. Their motivation levels also may be poor and may find it difficult to adjust with the teaching learning process and can drop out or fail in the programme. The poor performance may not be a sign of the poor capacity or talent but may be due to inappropriate teaching methods, poor family situations, inadequate motivations and supports, unscientific learning practices or even the inability to converse in an unfamiliar language

On the basis of their preceding exam performance, current subject performance , class observation, and learning speed, students can be classified in two groups; advanced learners and slow learners. Each type of students have different learning attitudes and learning habits. A faculty has to adapt a teaching methodology such that he/she may not lose the attention of the slow learners and turn off the advanced learners.

The purpose of assessment of the learning levels of the students and conduction of activities for them is

- Identification of the slow learners and advanced learners in the class.
- To ensure that slow learners and advanced learners are taken care as per their needs.
- To help them improve their academics and career prospects.

This manual describes the constituent parts of the slow learner and advanced learner identification process and activities for them and includes guidance on process.

Process Input:

- To start the identification of slow and advanced learner process ,the following inputs are required Overall result of the preceding examination.
- Class test result.
- Class observation by subject teacher

Process to identify Slow learners and Advanced Learners:

- The process of assessment of the learning levels of the students and conduction of activities for them should be carried out through a systematic procedure as shown in the flow chart and explained in detail as below:

Process of Slow Learner and Advanced Lerner

1. Assessment of the learning levels of the students:

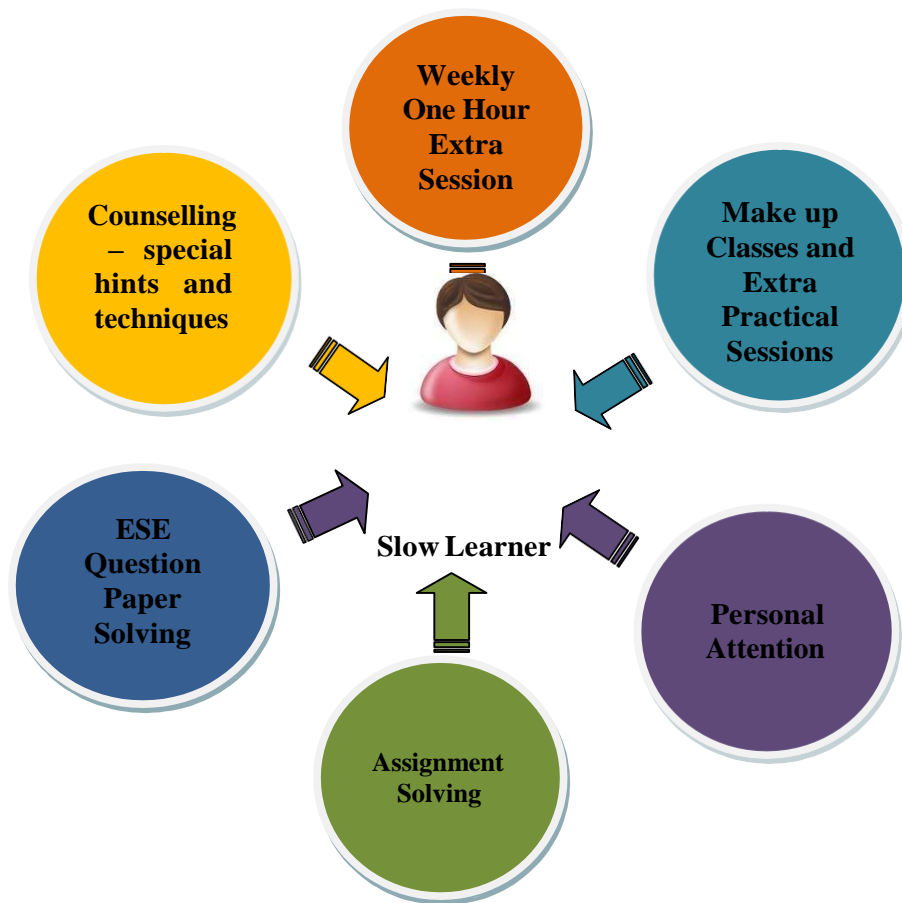

- Slow learner and advanced learners would be identified for **each subject** separately by respective subject teacher for **all the semesters**.
- Process to identify of slow learners and advanced learners would be conducted immediately after declaration of preceding semester university exam result or after one month of teaching in case of freshers (SEM I).
- Every subject teacher should conduct class test / online objective type test of their subject on syllabus covered till date or on first unit for 20 marks and duration of one hour to identify slow learners and advanced learners.
- Slow and advanced learners are identified based on following parameters and their weightage.

Sr. No.	Parameter	Weightage in Percentage
1	Marks obtained by student in objective type test /class test / unit test conducted for respective subject	50%
2	Academic performance of students in preceding university Examination	25%
3	Subject teacher observation	25%

- For parameter no. 3 every subject teacher should assess each student on scale of 1 to 10.
- Based on above parameter a report would be prepared for whole class for total 100%.
- The student securing marks below 40% would be identified as Slow Learners and the student securing marks above 70 % would be identified as Advanced Learners.
- After that separate list are prepared for both type of learners for further monitoring and conduction of problem-solving sessions /revision sessions for them.

1. Activities for Slow learners:

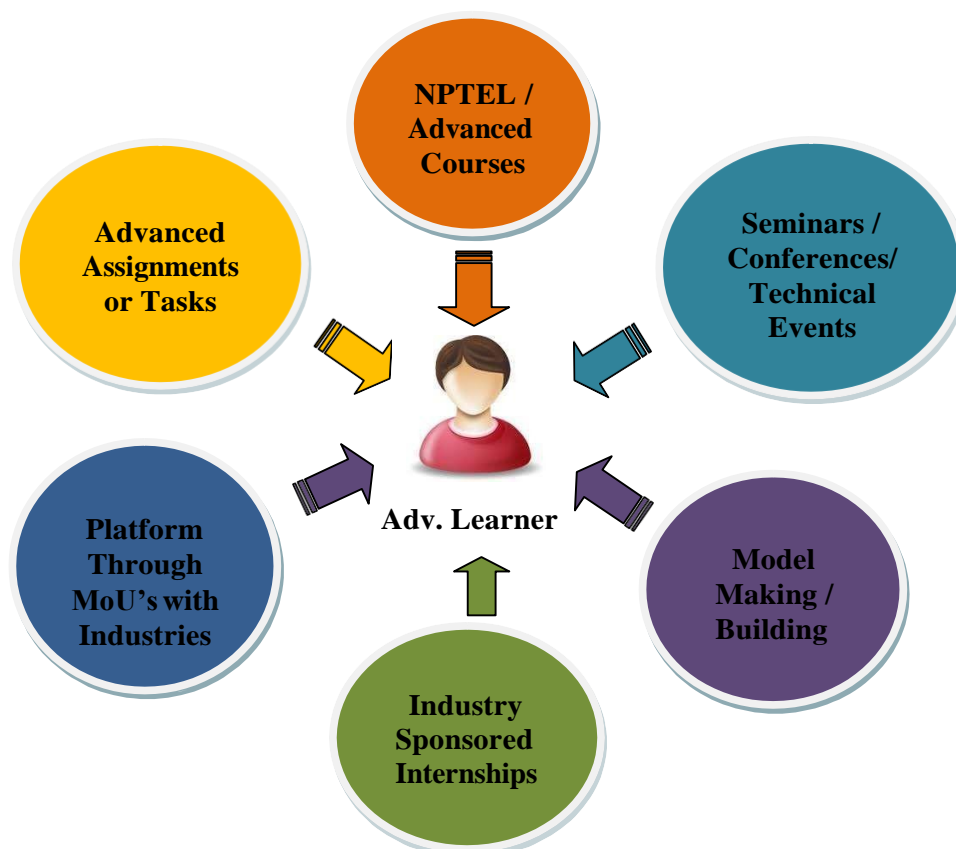

- Provisions should be made in the academic planner to conduct problem solving sessions /revision sessions/extra sessions to the slow learners which could be considered as remedial coaching program (RCP)
- Make up classes and practical sessions should be conducted for Direct Second Year (DSE) Students to complete the syllabus within time.
- Personal Attention should be provided by respective subject teacher in teaching Assignments and solving ESE question papers could be done periodically Question bank - DiscussionCounselling – special hints and techniques

Activities conducted for Slow Learners

1. Activities for Advanced learners

- Advanced assignments or tasks should be assigned to advanced learners Encouragement to complete NPTEL/Advanced courses.
- Encouragement to Participate in Seminars/Conferences/Technical Events Assignment based on Model making/building.
- Industrial visits and industry sponsored internships.
- Platform should be provided through MoU's with various reputed Industries/ Research institute for the advanced learners to explore their talents.

Activities conducted for Adv. Learner

Roles and Responsibilities of Course Teacher:

Course Teacher is responsible for carrying out different aspects of slow learner and advanced learner identification and activities to be conducted

Course Teachers will be responsible for:

- Conducting class test on unit 1 of 20 marks and duration of one hour.
- Evaluation of class test answer sheets.
- Preparing and maintaining report for whole class based on parameter decided for assessment of the learning levels of the students with their weightage.
- Preparing separate list of slow and advanced learners.
- Preparing schedule for extra sessions / problem solving sessions / revision sessions for slow learners.
- Maintaining the attendance of slow learners' sessions.
- Preparing the list of advanced assignment or list of tasks assigned to advanced learners. Preparing the report after ESE result declaration of current semester which shows the improvement in performance of slow learners to close the loop.
- Maintaining the records for slow learners and advanced learners' activity

Documents to be maintained

- Cover page for Slow & Adv. learners Activity.
- Report of result of class test / unit test.
- Report of marks obtained based on above parameter List of slow learners.
- List of advanced Learners.
- Schedule of activity for slow learners.
- Attendance record for session conducted for slow learners Report of performance improvement for slow learners List / Record of tasks given to advanced learners

Expected Outcome

- Timely conduction of slow learners' activities Records based on student progress and observation. Improvement in University Result.

Special measures adopted during pandemic for slow learners

- One on one counselling and mentoring via platforms like Google meet, MS teams, Zoom Conducting sessions for slow learners as per prepared schedule. keeping frequent short objective tests in every unit, revision and coaching.
- Counselling sessions to motivate and build confidence of slow learners, suggested remedial measures to improve focus and concentration in order to enable active participation in the class and to perform well in academics.

Method Adopted: Numerical MCQ for Competitive Exams

A train 360 m long is running at a speed of 45 km/hr. In what time will it pass a bridge 140 m long?

- A. 40 sec
- B. 42 sec
- C. 45 sec
- D. 48 sec

A jogger running at 9 kmph alongside a railway track in 240 metres ahead of the engine of a 120 metres long train running at 45 kmph in the same direction. In how much time will the train pass the jogger?

- A. 3.6 sec
- B. 18 sec
- C. 36 sec
- D. 72 sec

Two trains of equal length are running on parallel lines in the same direction at 46 km/hr and 36 km/hr. The faster train passes the slower train in 36 seconds. The length of each train is:

- A. 50 m
- B. 72 m
- C. 80 m
- D. 82 m

A train 240 m long passes a pole in 24 seconds. How long will it take to pass a platform 650 m long?

- A. 65 sec
- B. 89 sec
- C. 100 sec
- D. 150 sec

A train passes a station platform in 36 seconds and a man standing on the platform in 20 seconds. If the speed of the train is 54 km/hr, what is the length of the platform?

- A. 120 m
- B. 240 m
- C. 300 m
- D. None of these

Two trains running in opposite directions cross a man standing on the platform in 27 seconds and 17 seconds respectively and they cross each other in 23 seconds. The ratio of their speeds is:

- A. 1 : 3
- B. 3 : 2
- C. 3 : 4
- D. None of these

The length of the bridge, which a train 130 metres long and travelling at 45 km/hr can cross in 30 seconds, is:

- A. 200 m
- B. 225 m
- C. 245 m
- D. 250 m

A train running at the speed of 60 km/hr crosses a pole in 9 seconds. What is the length of the train?

- A. 120 metres
- B. 180 metres
- C. 324 metres

D. 150 metre

A 270 metres long train running at the speed of 120 kmph crosses another train running in opposite direction at the speed of 80 kmph in 9 seconds. What is the length of the other train?

A. 230 m

B. 240 m

C. 260 m

D. 320 m

E. None of these

Two trains, each 100 m long, moving in opposite directions, cross each other in 8 seconds. If one is moving twice as fast the other, then the speed of the faster train is:

A. 30 km/hr

B. 45 km/hr

C. 60 km/hr

D. 75 km/hr

The ratio between the length and the breadth of a rectangular park is 3 : 2. If a man cycling along the boundary of the park at the speed of 12 km/hr completes one round in 8 minutes, then the area of the park (in sq. m) is:

A. 15360

B. 153600

C. 30720

D. 307200

The ratio between the perimeter and the breadth of a rectangle is 5 : 1. If the area of the rectangle is 216 sq. cm, what is the length of the rectangle?

A. 16 cm

B. 18 cm

C. 24 cm

D. Data inadequate

E. None of these

A right triangle with sides 3 cm, 4 cm and 5 cm is rotated the side of 3 cm to form a cone. The volume of the cone so formed is:

A. 12π cm³

B. 15π cm³

C. 16π cm³

D. 20π cm³

A tank is 25 m long, 12 m wide and 6 m deep. The cost of plastering its walls and bottom at 75 paise per sq. m, is:

A. Rs. 456

B. Rs. 458

C. Rs. 558

D. Rs. 568

The length of a rectangle is halved, while its breadth is tripled. What is the percentage change in area?

A. 25% increase

B. 50% increase

C. 50% decrease

D. 75% decrease

A rectangular park 60 m long and 40 m wide has two concrete crossroads running in the middle of the park and rest of the park has been used as a lawn. If the area of the lawn is 2109 sq. m, then what is the width of the road?

A. 2.91 m

B. 3 m

C. 5.82 m

D. None of these

A train 125 m long passes a man, running at 5 km/hr in the same direction in which the train is going, in 10 seconds. The speed of the train is:

- A.** 45 km/hr
- B.** 50 km/hr
- C.** 54 km/hr
- D.** 55 km/hr

**DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE
(AUTONOMOUS)**

College with Potential for Excellence
Linguistic Minority Institution. Affiliated to University of Madras

Staff Name: Dr A. Anitha

Method Adopted: Computer Science MCQ for Competitive Exams

Section – 1

1. What is the term used for describing the judgmental or common sense part of problem solving?

- A.** Heuristic
- B.** Critical
- C.** Value based
- D.** Analytical
- E.** None of the above

2. What stage of the manufacturing process has been described as "the mapping of function onto form"?

- A.** Design
- B.** Distribution

- C. project management
 - D. field service
 - E. None of the above
-

3. Which kind of planning consists of successive representations of different levels of a plan?

- A. hierarchical planning
 - B. non-hierarchical planning
 - C. All of the above
 - D. project planning
 - E. None of the above
-

4. What was originally called the "imitation game" by its creator?

- A. The Turing Test
 - B. LISP
 - C. The Logic Theorist
 - D. Cybernetics
 - E. None of the above
-

5. Decision support programs are designed to help managers make:

- A. budget projections
- B. visual presentations
- C. business decisions
- D. vacation schedules
- E. None of the above

Section – 2

1. A series of AI systems developed by Pat Langley to explore the role of heuristics in scientific discovery.

- A. RAMD
 - B. BACON
 - C. MIT
 - D. DU
 - E. None of the above
-

2. A.M. Turing developed a technique for determining whether a computer could or could not demonstrate the artificial intelligence. Presently, this technique is called

- A. Turing Test
 - B. Algorithm
 - C. Boolean Algebra
 - D. Logarithm
 - E. None of the above
-

3. A Personal Consultant knowledge base contains information in the form of:

- A. parameters
 - B. contexts
 - C. production rules
 - D. All of the above
 - E. None of the above
-

4. Which approach to speech recognition avoids the problem caused by the variation in speech patterns among different speakers?

- A. Continuous speech recognition

- B. Isolated word recognition
 - C. Connected word recognition
 - D. Speaker-dependent recognition
 - E. None of the above
-

5. Which of the following, is a component of an expert system?

- A. inference engine
- B. knowledge base
- C. user interface
- D. All of the above
- E. None of the above

Section – 3

1. The primary interactive method of communication used by humans is:

- A. reading
 - B. writing
 - C. speaking
 - D. All of the above
 - E. None of the above
-

2. Elementary linguistic units which are smaller than words are:

- A. allophones
- B. phonemes
- C. syllables
- D. All of the above
- E. None of the above

3. In LISP, the atom that stands for "true" is

- A. t
- B. ml
- C. y
- D. time
- E. None of the above

4. A mouse device may be:

- A. electro-chemical
- B. mechanical
- C. optical
- D. both b and c
- E. None of the above

5. An expert system differs from a database program in that only an expert system:

- A. contains declarative knowledge
- B. contains procedural knowledge
- C. features the retrieval of stored information
- D. expects users to draw their own conclusions
- E. None of the above

METHOD ADOPTED: Real world example of OSI Model

OSI Model

The Open Systems Interconnect model (OSI Model) explains all the individual functions that are necessary for the Internet to work.

It is a set of seven *independent* functions which combine to accomplish the end-goal of Computer to Computer communication. Much like a car is composed of independent functions which combine to accomplish the end-goal of moving the car forward: A battery powers the electronics, an alternator recharges the battery, an engine rotates a driveshaft, an axle transfers the driveshaft's rotation to the wheels, and so on and so forth. Each individual part can be independently replaced or worked on, and as long as each individual part is functioning properly, the car moves forward.

The OSI model is divided into seven different layers, each of which fulfills a very specific function. When combined together, each function contributes to enables full computer to computer data communication.

Application	7
Presentation	6
Session	5
Transport	4
Network	3
Data Link	2
Physical	1

In the rest of this article, we will look at each of the individual layers of the OSI model and their individual responsibility.

OSI Layer 1 – Physical

The Physical layer of the OSI model is responsible for the transfer of bits — the 1's and 0's which make up all computer code. This layer represents the physical medium which is carrying the traffic between two nodes. An example would be your [Ethernet cable](#) or Serial Cable. But don't get too caught up on the word "Physical" — this layer was named in the 1970s, long before wireless communication in networking was a concept. As such, WiFi, despite it not having a physical, tangible presence, is also considered a Layer 1 protocol.

Simply put, **Layer 1 is anything that carries 1's and 0's between two nodes.**

The actual format of the data on the "wire" can vary with each medium. In the case of Ethernet, bits are transferred in the form of electric pulses. In the case of Wifi, bits are transferred in the form of radio waves. In the case of Fiber, bits are transferred in the form of pulses of light.

Aside from the physical cable, Repeaters and Hubs also operate at this layer.

A Repeater simply repeats a signal from one medium to the other, allowing a series of cables to be daisy chained together and increase the range a signal can travel beyond the single cable limit. These are commonly used in large WiFi deployments, where a single WiFi network is "repeated" throughout multiple access-points to cover a larger range.

A Hub is simply a multi-port Repeater. If four devices are connected to a single Hub, anything sent by one device gets repeated to the other three.

OSI Layer 2 – Data Link

The Data Link layer of the OSI model is responsible for interfacing with the Physical layer. Effectively, Layer 2 is responsible for putting 1's and 0's on the wire, and pulling 1's and 0's from the wire.

The Network Interface Card (NIC) that you plug your Ethernet wire into handles the Layer 2 functionality. It receives signals from the wire, and transmits signals on to the wire.

Your WiFi NIC works the same way, receiving and transmitting radio waves which are then interpreted as a series of 1's and 0's.

Layer 2 will then group together those 1's and 0's into chunks known as Frames.

There is an addressing system that exists at Layer 2 known as the Media Access Control address, or MAC address. **The MAC address uniquely identifies each individual NIC.** Each NIC is pre-configured with a MAC address by the manufacturer; in fact, it is sometimes referred to as the Burned In Address (BIA).

Aside from your NIC, a Switch also operates at this layer. **A Switch's primary responsibility is to facilitate communication *within* Networks** (this idea will be expanded upon in [a later article](#) in this series).

The overarching function of the Data Link layer is to deliver packets from one NIC to another. Or to put it another way, **the role of Layer 2 is to deliver packets from *hop to hop*.**

OSI Layer 3 – Network

The Network layer of the OSI model is responsible for packet delivery from end to end.

It does this by using another addressing scheme that can logically identify every node connected to the Internet. This addressing scheme is known as the Internet Protocol address, or the IP Address.

It is considered logical because an IP address is not a permanent identification of a computer. Unlike the MAC address which is considered a physical address, the IP address is not burned into any computer hardware by the manufacturer.

Routers are Network Devices that operate at Layer 3 of the OSI model. **A Router's primary responsibility is to facilitate communication *between* Networks.**

As such, a Router creates a boundary between two networks. In order to communicate with any device not directly in your network, a router must be used.

OSI Model – Layer 2 vs. Layer 3

The interaction and distinction between Layer 2 and Layer 3 is crucial to understanding how data flows between two computers. For example, if we already have a unique L2 addressing scheme on every NIC (like MAC addresses), why do we need yet another addressing scheme at L3 (like IP addresses)? Or vice versa?

The answer is that both addressing schemes accomplish different functions:

- **Layer 2** uses **MAC addresses** and is responsible for packet delivery from **hop to hop**.
 - **Layer 3** uses **IP addresses** and is responsible for packet delivery from **end to end**.
- When a computer has data to send, it encapsulates it in a IP header which will include information like the Source and Destination IP addresses of the two “ends” of the communication.

The IP Header and Data are then further encapsulated in a MAC address header, which will include information like the Source and Destination MAC address of the current “hop” in the path towards the final destination.

Here is an illustration to drive this point home:

Notice between each Router, the MAC address header is stripped and regenerated to get it to the next hop. The IP header generated by the first computer is only stripped off by the final computer, hence the IP header handled the “end to end” delivery, and each of the four *different* MAC headers involved in this animation handled the “hop to hop” delivery.

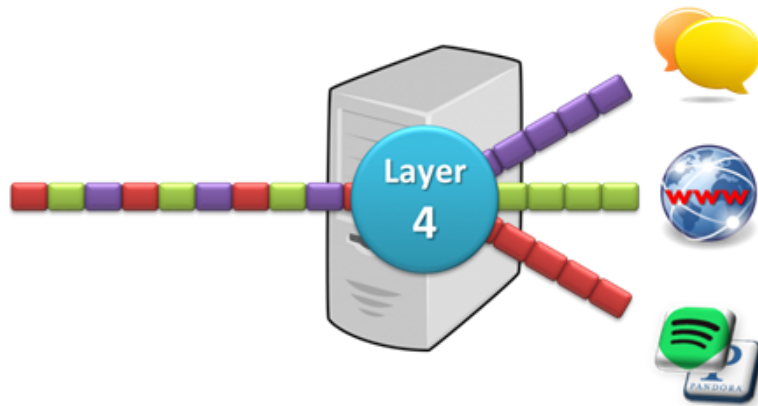

OSI Layer 4 – Transport

The Transport layer of the OSI model is responsible for distinguishing network streams.

At any given time on a user’s computer there might be an Internet browser open, while music is being streamed, while a messenger or chat app is running. Each of these applications are sending

and receiving data from the Internet, and all that data is arriving in the form of 1's and 0's on to that computer's NIC.

Something has to exist in order to distinguish which 1's and 0's belong to the messenger or the browser or the streaming music. That "something" is Layer 4:

Layer 4 accomplishes this by using an addressing scheme known as Port Numbers.

Specifically, two methods of distinguishing network streams exist. They are known as the Transmission Control Protocol (TCP), or the User Datagram Protocol (UDP).

Both TCP and UDP have 65,536 port numbers (each), and a unique application stream is identified by both a Source and Destination port (in combination with their Source and Destination IP address).

TCP and UDP employ different strategies in how data streams are transferred, and their distinction and inner workings are both fascinating and significant, but unfortunately they are outside the scope of this article series. They will be the topic of a future article or series.

To summarize, if Layer 2 is responsible for *hop to hop* delivery, and Layer 3 is responsible for *end to end* delivery, it can be said that **Layer 4 is responsible for *service to service* delivery.**

OSI Layer 5, 6, and 7

The Session, Presentation, and Application layers of the OSI model handle the final steps before the data transferred through the network (facilitated by layers 1-4) is displayed to the end user.

From a purely Network Engineering perspective, the distinction between Layers 5, 6, and 7 is not particularly significant. In fact, there is another popular Internet communication model known as the [TCP/IP model](#), which groups these three layers into one single encompassing layer.

The distinction would become more significant if you were involved in Software Engineering. But as this is not the focus of this article series, we will not dive deep into the differences between these layers.

Many network engineers simply refer to these layers as L5-7 or L5+ or L7. For the remainder of this series, we will do the same.

Encapsulation and Decapsulation

The last item we need to discuss before we move on from the OSI Model is that of **Encapsulation and Decapsulation**. These terms refer to **how data is moved through the layers from top to bottom when sending and from bottom to top when receiving**.

As the data is handed from layer to layer, each layer adds the information it requires to accomplish its goal before the complete datagram is converted to 1s and 0s and sent across the wire. For example:

- Layer 4 will add a TCP header which would include a Source and Destination port
- Layer 3 will add an IP header which would include a Source and Destination IP address
- Layer 2 would add an Ethernet header which would include a Source and Destination MAC address

On the receiving end, each layer strips the header from the data and passes it back up the stack towards the Application layers. Here is the whole process in action:

Note that this is only an example. The header that will be added will be dependent on the underlying communication protocol. For instance, a UDP header might be added at Layer 4 instead, or an IPv6 header might be added at Layer 3.

Either way, it is important to understand that as data is sent across the wire, it gets passed down the stack and each layer adds its own header to help it accomplish its goal. On the receiving end, the headers get stripped off one at a time, layer by layer, as the data is sent back up to the Application layer.

THE OSI MODEL - REAL WORLD EXAMPLE

REAL WORLD EXAMPLE

Due to popular demand, InetDaemon has written an operational example of how the [OSI model](#) can be used to describe what happens when you browse a [web page](#) on a web site. This page you are reading is stored on our website and you are most probably using a [web browser](#) to read this. We will use the [OSI model](#) to describe what happens when you click a link in a [web page](#) in your [web browser](#) and what happens as the [web server](#) receives, processes and responds to your request. This example assumes that you are on a [local area network](#) and that you are using an [Ethernet](#) card to communicate with the network. If you're on a dial-up [modem](#), it will work a little differently from the [data link layer](#) down. [Modem](#) communication is a bit more complicated. We won't cover that here.

LAYER	EXAMPLE	FUNCTION/ACTIVITY
APPLICATION	Web Browser	<p>A web browser such as Internet Explorer or Netscape provides the means for your computer to contact a web server and download several files that go together to produce a single web page.</p> <p>You can request a web page by typing in a web address (a URL) or by clicking a link in an open web page.</p> <p>The web browser is an APPLICATION. The web browser application gives you the means to select a web server, contact the server and request a web page. The web browser handles the process of finding the web server (the remote computer that has the web page you want stored on it) , requesting the desired web page and displaying all the files contained within the web page.</p>
PRESENTATION	HTTP	<p>The web browser handles PRESENTATION of the web page to the user by converting the files stored at the web server into formats used to display them on your computer.</p> <p>Your web browser supports various text formats (UNICODE and ASCII), image file formats (JPG, GIF, PNG, BMP), audio file formats (WAV, MP3, AIFF) as well as Hypertext Markup Language (HTML) and one or more scripting languages (JavaScript, JScript, VBScript). Conversion of data from one format to another is the job of the PRESENTATION layer. A web browser can convert these file formats into the local formats used on the local computer for displaying images, playing sounds and displaying text; if it cannot, it often can launch an application which does understand the format. Much of the PRESENTATION layer conversions are handled in the program you're running.</p>

SESSION		<p>When you request a web page, a the web browser opens a TCP connection to the web server. The web server sends back the web page and closes the connection. Your web browser then parses the HTML of the web page. Within the web page are instructions written in HTML tags which tell the browser where to find additional files to be displayed within the web page such as style sheets, sound files, images, movies, Flash files and applets. Your web browser automatically opens additional TCP connections to the web server. Each TCP connection is a SESSION.</p>
TRANSPORT	TCP	<p>To communicate with a web server your computer must open a TCP connection to the web server and request a web page. The TCP connection breaks up the web page into manageable chunks, lables them with numbers so they can be reassembled in the correct order and TRANSPORTS the pieces across the correct SESSION.</p>
NETWORK	IP ARP	<p>Internet Protocol (IP) is a NETWORK layer protocol that uses unique addresses for the web server and for your computer. IP provides the means for your computer to determine whether the web server is a local computer or a computer located somewhere on the Internet. To reach a web server on the Internet, IP protocol also allows your computer to figure out how to reach the Internet web server via your default gateway. Your computer creates a message addressed to the web server with your computer's return IP address. Your computer uses ARP to figure out the physical MAC address of the default gateway and then passes the data to the NETWORK layer.</p>
DATA LINK	LLC MAC	<p>Once the request from your web browser has been created it is sent to the network card. Once it reaches your network card it must be converted into a message that is sent from your computer to the default gateway which will forward the message to the Internet. At the DATA LINK layer, the web request is inserted inside a network request to the default gateway.</p>
PHYSICAL	CSMA/CD	<p>The physical layer provides the means to transmit the web page request to the default gateway.</p>

Java programs

P Pallavi

Turned in

Return

```
1 public class PrimeExample {
2     public static void main(String args[]) {
3         int num, flag=0;
4         num=Integer.parseInt(args[0]);
5         //num=2;
6         //num=10;
7         System.out.println("Is not prime number");
8         //num=10;
9         for(i=2;i<=num;i++)
10            if(num%i==0)
11                System.out.println("Is not prime number");
12            flag=1;
13        }
14    }
15 }
16 }
17 }
18 }
19 }
20 }
```

Result
\$javac PrimeExample.java
\$java -Duser.dir=. PrimeExample
2 Is prime number

3.Generate Random number using Java

```
1 import java.lang.Math;
2 public class RandomNumberExample1 {
3     {
4     public static void main(String args[])
5     {
6     // Generating random numbers
7     System.out.println("1st Random Number: " + Math.random());
8     System.out.println("2nd Random Number: " + Math.random());
9     System.out.println("3rd Random Number: " + Math.random());
10    System.out.println("4th Random Number: " + Math.random());
11    }
```

Result
\$javac RandomNumberExample1.java
\$java -Duser.dir=. RandomNumberExample1
1st Random Number: 0.852044330927973
2nd Random Number: 0.723090292151429
3rd Random Number: 0.8678472840526837
4th Random Number: 0.27873069827031108
