The morning of Friday 17/12/2021, was life changing moment in the lives of B.A.English students. Where, all participants were excited to interact with the young gems. There were 31 students who took part in the programme 'ENHANCING CAPABILITIES'. Children had a great time with us, they had a wonderful experience and I think it would help them in different ways of building up their future.

There were more than 100 children, everyone was looking eager and curious to have conversation with us. We taught them values of education, responsibilities and health. Also, we taught them, role of a student, we have given exam tips, then some entertainment activities have been conducted

The programme was a grand success, the department plans to organize similar outreach programmes in near future. The school management gave us a huge support in conducting this programme.

Outcome of the programme:

As the programme was a grand success filled with memorable joys, it made us to reminisce our childhood and school days, which were filled with beautiful memories.

Report of the Program:

Incessant rainfall has continued to batter Chennai, which recorded its second-highest November rainfall in a decade, according to official figures.

With heavy rains lashing down many animals have been forced to take shelter under parked cars and deserted garbage bins.

Our department staff and student volunteers contributed money and bought biscuit packets and other foods to the local street dogs in this rainy weather.

Outcome of the Program:

While you help each other out, don't forget to feed the animals around your homes.

It won't take too much effort, but will mean a great deal to an animal stuck in the middle of nowhere.

Protection of stray beings is the moral responsibility of each and every citizen.

Detailed report of the programme:

Dr. S. Radhakrishnan, the eminent educationist and former President of India once said that "All education is, on the one side, a search for truth; on the other side, it is a pursuit of social betterment. You may discover truth but you should apply it to improve the status of society". The President said that while the students should try and fulfill their own dreams, they should also try to fulfill the expectations of the society and country which is theirs and which has nurtured them

Department of B. Com (Bank Management) organised a Student Outreach Programme on 13/12/2021. The student outreach programme was named SNEHAM. It was conducted to make students to provide services to populations who might not otherwise have access to those services. A key component of outreach is that the groups providing it are not stationary, but mobile; in other word they are meeting those in need of outreach services at the locations where those in need are. In addition to delivering services, outreach has an educational role, raising the awareness of existing services. The Community Outreach Program gives students the opportunity to get involved in community service on a regular basis.

I thank our Secretary Sri. Ashok Kumar Mundhra and our Principal Dr. S. Santhosh Baboo for giving us the opportunity.

Outcome of the programme/Event:

The outreach programs developed and enhanced the leadership qualities, self-confidence, communication skills, managerial skills, and responsibilities toward the rural community.

Report:

The Department of Statistics organized two days social activity in the form of online classes for Eveleth class students in a government school which is located in Ayanambakkam, Chennai on the topic of Matrix Algebra and Determinants. The resource persons were Mr.T.Maheshwaran and Dr. S.Santhi from same department of statistics. On the first day students learnt about the topic of Matrix Algebra with examples and exercise problems. On the second day students learnt about the determinants and scope of study of statistics and after the classes, exercise problems sent to students group.

Comment:

The students had learnt about basics and real life applications of matrices and scope of study of statistics at college level.

Property 3:

If two rows (columns) of a determinant are identical then the value of the determinant is zero.

Proof:

Let Δ be the value of the determinant. Assume that the first two rows are identical. By interchanging R_1 and R_2 we obtain $-\Delta$ (by property 2). Since R_1 and R_2 are identical even after the interchange we get the same Δ .

$$\text{i.e. } \Delta = -\Delta \Rightarrow 2\Delta = 0 \text{ i.e. } \Delta = 0$$

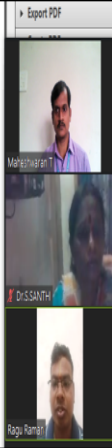

Property 4:

If every element in a row (or column) of a determinant is multiplied by a constant "k" then the value of the determinant is multiplied by k.

Proof:

$$\text{Let } \Delta = \begin{vmatrix} a_1 & b_1 & c_1 \\ a_2 & b_2 & c_2 \\ a_3 & b_3 & c_3 \end{vmatrix}$$
